Re: *Sky Valley Education Center*

Dear Michelle:

On behalf of the Monroe School District (the "District"), which this firm represents in relation to environmental matters, I have enclosed a revised draft Monitoring and Maintenance Implementation Plan relating to the District's Sky Valley Education Center (the "SVEC") for your review and consideration, as well as a redline showing the changes since your last review. If you would like to set up a conference call to go over any questions or comments that you may have in relation to this plan, please let us know.

In conjunction with this submittal, the District would also like to formally request that the EPA renew the Risk-Based Disposal Method for PCB Bulk Product Waste and PCB Remediation Waste that was originally approved on September 15, 2017, a copy of which is enclosed for your reference. This renewed approval is sought in relation to the monitoring and maintenance activities that will be conducted by the District pursuant to the enclosed Monitoring and Maintenance Implementation Plan and in relation to the encapsulated PCB-containing caulk and carpet remnants that remain at the SVEC.

If you have questions relating to the enclosed submittals or the requested approval, please do not hesitate to contact me.

Sincerely,

Matthew J. Stock
