San Mateo County Mosquito and Vector Control Visits TN

Did you know that male mosquitoes find their mates by using their antennae to detect the frequency of a female's buzz? Dr. Rachel Curtis-Robles, Public Education Officer for the San Mateo County Mosquito and Vector Control District, shared this and other fascinating information about mosquitoes during her presentation to the two AP Environmental Science classes. She discussed how her office works to control mosquitoes and other vectors to prevent the spread of diseases. Students also had the chance to observe and draw mosquito larvae. The presentation offered students an insightful look into the world of vector control and mosquito behavior

TN Bands Used Shoe Drive | Collecting Until Oct 15

Used Shoe Drive

COLLECTING UNTIL
OCTOBER 15

The Terra Nova Band is collecting used shoes of all types and sizes. The only types we CANNOT accept are rollerblades, ice skates, metal cleats, single shoes, wet or moldy shoes or shoes with holes.

The shoes are heading to Funds2Orgs which supports over 4,000 families of micro-enterprise partners, with the majority of them being women-owned. The micro-enterprise industry represents one of the most effective ways to lift many families out of poverty in devastated economies. The shoes you donate serve as a philanthropic bridge to give people a hand-up, rather than just a hand-out.
