

JOB PLACEMENT RATES FOR PROGRAM COMPLETERS

The Warren County Career Center strives to collect accurate data on all program graduates. We use several methods to collect this information:

- * Exit Survey
- * Follow up phone calls
- * Web-based survey
- * Input from staff members
- * Personal contact with the students

When a student obtains employment, either during training or following completion of the program, the student is requested to provide the following information to the Program Coordinator, instructor or office personnel: employer name, address, phone number, immediate supervisor, job title, hourly wage, hours per week worked and start date. We update our student information at various points: before completion, at completion and within 6 months after completion.

The collected data is categorized into two fields: Employed/Placed and Not Employed. The data for Employed/Placed is then used to calculate the graduate placement/employment rates for WCCC. The rate is calculated using the following equation: total number of employed or placed completers/total number of completers.

These placement rates are calculated from data for program completers who completed their program between July 1 and June 30 of each fiscal year listed.

	FY21	FY22	FY23	FY24
# OF COMPLETED STUDENTS	306	310	320	390
# OF STUDENTS EMPLOYED UPON COMPLETION	242	260	281	226
EMPLOYMENT RATE	79%	83%	87%	57%

Definitions:

Completer/Graduate: A student who successfully completes an approved program with a grade of 76% or better and an attendance rate of 90% or better.

Employed/Placed: A student who finds employment in the related field immediately or at least six (6) months after completing a program, enlists in the military and/or enrolls into a continuing education program.

Not Employed: A student who finds employment in a non-related field; student who is not employed; student who refuses employment.
