

Experience On First Day Of College

My first days of college were pretty special. The atmosphere was much different than High School. It felt more Mature and relaxing than any other campus I've been to. You can also buy snacks and food at the campus which I'm not used to.

The work is not as hard as I thought it would be. My siblings always told me how chill the professors are, but I never experienced it myself. We got out of class 2 and a half early because there wasn't a lot to do. The professor was really relaxed which made me comfortable to be around him.
