

# Field trip to the Toyota Plant

The field trip to the Toyota plant was a fun experience. I had never been there before and it was something new and different. We got to make the toyota logo on a press of a penny, I still have mine. Seeing the different parts and how there is a job for every body in making a car somehow.The way the robots would move around on their own was cool it reminded me of walle.

We got to ride around on a train thingy to see how everybody worked together to build cars.It was really loud in there but it was amazing seeing all the work that went into making a vehicle.
