

First day P-tech Document

My first day at the face to face computer classes was not as hard as I had thought it would be. I woke up the morning of my first class very nervous and anxious I made sure I wore nice clothes and fixed my hair. When I got to the school I was even more nervous but what helped me calm down was realizing that it was also all my friends first day at face to face so we were all in it together. On the way over to the college I made sure I had everything and was ready for my first day of college.

When the professor closed the door and started the class all my nerves went away. I realized it was just like my classes back at the highschool except for the fact that it was for a college credit. I really like my professor and he is very cool and funny. It is nothing like how I thought he would be. We started the day by introducing ourselves and getting into teams. After we were separated into teams he talked to us about what we will learn and how things will work for the class. After he explained everything he released us early. All in all it was a very good first day and I am very excited to continue this class.
