

CONSTRUCTION NOTICE

Sewer Rehabilitation and House Connection Lining

Starting early October, the Metropolitan District (MDC) and their contractor, National Water Main Cleaning Company will begin sanitary sewer repairs and rehabilitation on several streets in the Town of West Hartford. You are receiving this notification because you either live on a street where the work will take place or in close proximity to planned work areas. Activities will be varied and intermittent over the course of this project and notifications will be provided ahead of each phase of work.

Sewer Lining and Rehabilitation

Work will include the rehabilitation (pipe lining) of existing sewer mains in the street and sewer house connections to properties, as necessary. Initial activities will involve cleaning and CCTV (closed circuit tv) of the sewer main and laterals.

House Connection Lining (*requires permission from Property Owner)

Some properties in the area may need additional lining or repair work done to their sewer house connection based on its condition. This is the pipe (lateral) that connects your house to the sewer main in the street. Sewer lining is performed to help **stop excess water from getting into the pipe** (through cracks and leaks), **improve the structural integrity of the pipe, and reduce the risk of blockages**. It is typically a “no dig” method requiring no disturbance to your lawn.

Door Knocking - Permission Forms*

An MDC Outreach Liaison, or designated representative, will be door knocking and handing out informational flyers to any property identified as needing lateral lining or repair, and will explain property owner Permission Forms necessary to complete the House Connection lining work. All MDC staff, consultants and contractors must be properly identified and present ID upon request.
