

On behalf of the Division of Business and Finance, I am thrilled to be able to launch this ERP Central site to provide our end users with pertinent, timely information about our new ERPT project. Working hand-in-hand with the Talent Management and Technology Departments, the District has embarked on this journey to bring a modern, integrated solution for the District's business and human resource needs.

This is a transformational project for our district as we must make changes to upgrade our outdated systems but also embrace those changes to maximize the delivery of the new Frontline software system. We have dedicated professionals that are working thoughtfully and intentionally towards implementing a system for our future. Together we will achieve success and launch on July 1, 2025!
