

Proposition #2 – School Bus Purchase

Proposition #2 seeks voter approval for the purchase of a 22 passenger Chevy Collins school bus. This bus will replace bus #90, a 2009, Chevy Collins with approximately 75,000 miles. The bus body is starting to wear and will be needing repairs in the future. Purchasing the bus will save the costs of future repairs and keep the District on its bus replacement schedule. The District will be selling bus #90 in a public sale if the purchase of the new bus is approved.

The total cost of the bus is \$53,232. The estimated local share of the bus after state aid is \$11,818. For every \$1 spent on a bus purchase the District receives approximately 77.8 cents back in transportation aid from New York State.
