Transportation

TICKETS

Note: Use of public transport in Prague without a valid ticket will result in a fine. The same ticket may be used on any form of public transport (metro, trams and buses) so long as it is valid.

There are several methods to purchase tickets for public transport in Prague. Firstly, you may download the **PiD Lítačka app** to purchase digital, long-term passes, tickets or find connections for your travel. Most trams and buses in Prague are equipped with **contactless orange/yellow ticket machines** on board. Tickets may also be purchased at **yellow machines upon entering the underground metro** which are not time stamped upon purchase and are better for purchasing many tickets ahead of time.

Tickets from button or touchscreen ticket machines must be validated (stamped) in a ticket validator before entering the subway platform or immediately after boarding a bus or tram! (pid, n.d)
