

BASIC ELECTRICITY

Registration Opens November 4, 2024 Course Description

This is a slow-paced, beginning course for those with little to no experience in the electrical/electronic field. The course introduces terminology, helps students identify the components of a circuit, helps students understand circuit calculations for voltage, current and resistance and much more. During the course students will learn how to wire basic circuits using the Amatrol 990-ACDC1 machine (see picture), they will also learn how to use the various components of a digital multimeter, and they will learn different formulas such as Ohm's Law and different voltage, current and resistance calculations formula.

Requirements

CASAS Pre and Post Assessment Mandatory first day of class attendance or will be dropped

Cost

Registration Fee: \$275 Debit/Credit Only No refunds after the first day of class

Class Schedule

Monday, Wednesday, Friday 8:00AM - 10:30AM January 15, 2025 - February 7, 2025

March 17, 2025 - April 11, 2025

Monday - Thursday 1:30PM - 3:00PM

April 7, 2025 - May 22, 2025 Dates and time are subject to change

Industry Job Outlook

*Career opportunities in this field are expected to grow up to 25% through 2030 in the Tulare County region.

*According to the State of California Employment Development Department

Upon successful completion of the course, student will receive Certificate of Completion
