Achievement Level Distribution

Data Reflections

- **We will spread the testing window out this year**
 - We condensed the testing window in 2022-23 which resulted in less instructional time prior to testing and possible test fatigue
- **Still seeing post pandemic effects with behaviors and academics**
 - These students' early grade levels were largely online/hybrid learning
 - Increased focus on SEL
- **Number of IEPs have increased significantly**
- **The number of ELs has gone down**
 - Greater number of students becoming proficient in English and being reclassified (which is a celebration) but it has resulted in lower subgroup scores
- **Team approach to science instruction**
 - 4th, 5th, Mr. Reily, and myself met in September to collaborate around data and instruction

Data Reflections

- We know who each of these students are and targeted supports are in place for areas of need
 - Identified the students on the cusp of meeting standards and providing intervention in ELA and math
 - Learning Center teachers push in and pull out small groups/every grade
 - Impact teacher provides push in and pull math intervention every grade
 - Math Mornings
 - iReady in full implementation
 - ELD groups meet four times per week, increased focus on writing and use of LEXIA
- Proud of the work we have done and committed to continuous improvement
