

Williamston Middle School
Placement Procedures for Math

Dear Parents and Students:

This letter is to clarify the WMS math placement procedures. With our GO Math program, all incoming 6th graders will be placed in Math 6. The opportunity for acceleration begins in 7th grade with two different math courses. The first is GO Math 7 which covers all the math state standards for 7th grade. The second is an Accelerated Math 7/8 course which covers the math state standards for both 7th and 8th grade in one year. Students will be recommended to take GO Math 7 or Accelerated Math 7/8 based on multiple sources of data. All incoming 7th graders will receive a letter with the end of the year report card stating which class they will be placed in based on their math data.

Please see below for the flow chart of math courses at Williamston Middle School.

If you have any questions regarding these procedures, please use the contact information listed below to reach us.

Sincerely,
Mrs. Laura Hill
