

Family Math Engagement
Grab & Go: Multiplication and Division Practice

This activity would be best used by:	
<input type="checkbox"/> Schools	<input checked="" type="checkbox"/> Families

Materials:

- Paper
- Pencil
- Calculator (for the parent)

Steps:

1. Create multiplication and division problems that utilize numbers within 100.
 - (a) Examples should incorporate numbers that divide with and without remainders.
 - (b) Examples: $94 \times 27 =$, $84 \div 27 =$
2. Allow your child to solve the problems using any method.
3. Listen to your child's reasoning for his/her method of solving the problem.
4. Parents use the calculator to check your child's accuracy.

Lagniappe:

- In upper elementary school, students develop fluency with addition, subtraction, multiplication, and division with multi-digit numbers.
- Note: Long division develops through the end of grade 5 and may not be automatic for students until the end of grade 6.
