

Steps to Help Maintain Strong Grades

Understanding and Maintaining your Grades

If we fall behind here's how we can improve

Quiz

This can be made up/ Retaken at any time at home after we take it in class
Students will sign into Edcite.com, press on assignments, and there will be a retake button next to the quiz.
After students have gotten a higher grade they need to message me on ATLAS to notify me

Classwork

can be corrected and made up anytime. Encourage your child to check Atlas regularly to see their classwork grades.
Corrected activities, with work shown, can earn full credit!

Focus Areas

- A Focus Area is a 14 question quiz that can only be taken in class
To **master** a focus are students must receive a 10 or higher on the quiz
- Have your child take notes at home using the resources available on Canvas.
 - Bring those notes to me during a Self-Directed Learning period for a retake

End of unit Test

Tests can be retaken by completing a Test Correction Sheet.
Process:
Your child will check with their teacher first to review the incorrect questions.
They will then use the Practice Test and corresponding problems to redo their answers.
Reminder: Students must do each problem twice and show their work to earn half credit.

If something on your grades do not look right, please contact your teacher as soon as possible. Our team is happy to help!
