Community

Ann Arbor is a family-oriented college community located in the southeast corner of Michigan, 36 miles west of Detroit. Ann Arbor is home to the University of Michigan, one of the country's top public universities. It shapes the composition of the city's economy, population, and cultural awareness. Ann Arbor is an important scientific, medical, and industrial research center. The public school district has 22 elementary schools, two K-8 schools, five middle schools, three alternative education facilities, and three comprehensive high schools, with an overall enrollment of 17,231 students.

Our School

Ann Arbor's Skyline High School is an integral part of the tradition of educational excellence in Ann Arbor. The school intentionally prepares students for the global challenges of the 21st century. Skyline fosters high student achievement through powerful relationship-building, Project-Based Learning, mastery teaching and learning, a vibrant professional learning community, four small learning community structures, and four magnet programs. Skyline High School's STEAM focused programs are delivered in a state-of-the-art facility. The student body is comprised of students who reside within the school boundary, and 318 students who attend through school of choice or in-district transfer. Skyline High School has an ethnically, racially, geographically and socio-economically diverse student body of approximately 1,249 students. There are 316 students in the 2024-2025 graduating class, made up of 53.2% Caucasian, 9.2% African American, 2.8% Hispanic/Latino, 14.6% Asian, 20.6% multiracial, 0.9% Middle Eastern, 0.3% American Indian or Alaskan, and 0.0% Pacific Islander.

***SEE COVID 19 STATEMENT BELOW**

Curriculum

Skyline High School's curriculum is grounded in teaching and learning for mastery. The curriculum is designed to meet the college readiness, Michigan, and ISTE literacy standards in addition to 21st century fluencies. Core course requirements include mathematics, science, social studies, language arts, and foreign languages. We offer a full range of electives in vocal music, orchestra, band, fine arts, physical education, and career/ technical education. We place a high priority on the social emotional health of our students. In alignment with this priority, we advise our students to push themselves in areas where they find success and enjoyment while maintaining a healthy balance of academic rigor, extra curricular activities and personal commitments. We advise students to take no more than two AP classes per trimester. We believe in the zone of proximal development, therefore there are limited AP offerings in the 9th and 10th grade and more AP options for 11th and 12th graders than any one student can take advantage of.

2.99-2.5	32
2.49-2.0	28
1.99-0	8

Skyline Magnet Programs

Magnet programs provide students with a thematic focus, instructional continuity, and opportunities to apply academics to problem solving in real-world experiences. Skyline students make magnet enrollment choices during the ninth grade year through an application and lottery process. Students who complete the three-year sequence are awarded an endorsed diploma. While our magnet classes do not hold an AP designation, with the high rigor of magnet classes, we advise students to take a fewer number of AP classes to maintain a healthy balance of academic rigor. In addition, due to master scheduling restrictions, magnet students often have to make difficult choices between magnet classes, music classes and AP classes.

MAGNET PROGRAM	DESCRIPTION
Communication Media and Public Policy	Students enrolled in the CMPP magnet program engage in hands on learning with nonprofits by creating digital products to address current issues in society, and explore politics and democracy through an in-depth analysis of evidence. US government and English Language Arts standards are embedded in CMPP courses, and the curriculum complements advanced placement social studies courses including Government and Politics, Statistics, and Macroeconomics.
Business Marketing and Information Technology	This magnet focuses on marketing and entrepreneurship and provides students with extensive writing and research skills. Students will explore, discover, question, create and communicate to reach the highest level of Bloom's and develop the 21 st century skills that employers in industry are now looking for. They will go through the business plan development process, build digital skills through web design and digital marketing and create college level presentations. English college and career readiness standards and speaking and listening standards will be followed.
Health and Medicine**	Using the same tools used by professionals in hospitals and labs, students engage in compelling, hands-on activities and work together to find solutions to health and medical problems. Students gain and apply knowledge in core biological principles of genetics, forensics, molecular and Mendelian genetic, cell structure and function, and anatomy and physiology. Students attain in-demand skills in data analysis and interpretation, communication, technical writing, laboratory planning and implementation. Students participate in internships, independent research, and/or cooperative learning experiences during senior year.
Design, Technology, Engineering, & Prototyping**	Students explore innovations that change and shape our human design world. Students apply science, technology, engineering, art, and mathematics (STEAM), to find practical solutions for real-world issues. National Math, Science, Engineering, and Art standards are embedded in DTEP courses; combined with hands-on problem-solving activities, students will understand how technology and society affect each other. Utilizing Project Lead The Way (PLTW) curriculum, computer aided design, and 3D printing prototyping, students focus on technological innovations for an environmentally sustainable society.

Advanced Class Opportunities

ADVANCED PLACEMENT CLASSES (Grade Offered)

Art History
 Biology (12)
 Calculus, AB & BC (11-12)
 Chemistry (11-12)
 Computer Science A (10-12)
 Computer Science Principles (9-12)
 Eng Lang & Comp 11 (11)
 Eng Lit & Comp 12 (12)

Environmental Science (10-12)
 French (12)
 Macroeconomics (11-12)
 Microeconomics (11-12)
 Music Theory (10-12)
 Precalculus
 Psychology (10-12)
 Statistics (11-12)
 Spanish (12)
 US Gov't & Politics (11-12)
 US History (10-12)

Dual Enrollment

Available through University of Michigan, Eastern Michigan University, Washtenaw Community College, and Siena Hts. University

ACCELERATED CLASSES

Designated AC on transcript

African American Humanities
 Algebra 2
 Geometry
 World Humanities

*COVID 19 Statement

During the 2019-20 school year, as a result of the COVID-19 global pandemic, the Ann Arbor Public Schools suspended in-school instruction on March 16, 2020. The district remained in virtual instruction mode through the end of the school year. Grades for all high school courses were suspended. Student transcripts reflect 'credit' with a G mark or 'no credit' with an NC mark for the 2nd semester or 3rd trimester.

For the 2020-21 school year, the Ann Arbor Public Schools started the school year fully virtual. In addition, the district moved all high schools to a six-period schedule, with an optional 7th period, in semesters. The six-period schedule was delivered in a block format with three courses meeting daily, two times per week. The optional 7th period met four days per week. Wednesdays were virtual, asynchronous learning days for students. High School students received grades for all courses for 1st semester using our established grading scale. In May of 2021, students returned to a hybrid-learning format.

For the 2021-22 school year, the Ann Arbor Public Schools returned to fully in-person instruction. Skyline High School returned to a 5 period, trimester schedule.
