

Family and Consumer Sciences

FAQS

FACS is part of CTE which is our Career and Technical Education department.

Nearly two-thirds of all high school graduates of FCS education programs enter some form of postsecondary program.

Rigorous academic content tied to technical subject matter in high school ensures that students will be ready for college. Internships and other work-based learning experiences that are a hallmark of FACS are attractive to all students who want to get a head start on a career, whether that career goal is doctor or nurse, chef, fashion designer, or educator. We provide employability and leadership skills valuable in the workplace or homelife.
