

Redistricting Update

Alexandria City Public Schools
School Board Meeting

October 24, 2024

Essential Questions

- What are the definitions that inform the redistricting process?
- What are the roles and purpose of the three committees that will support the redistricting process?
- What is the current status of the data analysis for the redistricting process?
- How and when can the community get involved with the redistricting process?

Definitions

Enrollment: Number of active students enrolled at ACPS on September 30 of each school year as detailed in the Fall Membership Report to the School Board.

Class Cap: Number of seats available to students in a homeroom class with a full-time teacher, based on the IHB-R policy.

Capacity: Measured student space based on the Educational Specifications; the total building capacity for a school is a sum of each classroom's measured capacity; this is not related to building occupancy as established by building code or the number of students that can be served at the school per the class cap.

Utilization: Student enrollment divided by the building capacity; we aim to be between 90-110%.

Definitions

Mobility: The ratio of the number of students living in an attendance area by grade to the number enrolled the prior year in the earlier grade. This ratio is averaged over four years of student data representing three years of change.

Student Generation Rates: The City of Alexandria produces this factor. Represent the ratio of enrolled ACPS students who live in Alexandria to the number of residential housing units in Alexandria.

Birth Rate Data: The number of babies born in an area each year. For school division redistricting, this data is used to estimate kindergarten enrollment each school year and helps predict how many students will attend schools in the future.

Redistricting Committees

**Redistricting
Advisory
Committee**

**Steering
Committee**

**School
Board**

**The name of the Community Review Committee has been changed to the Redistricting Advisory Committee.*

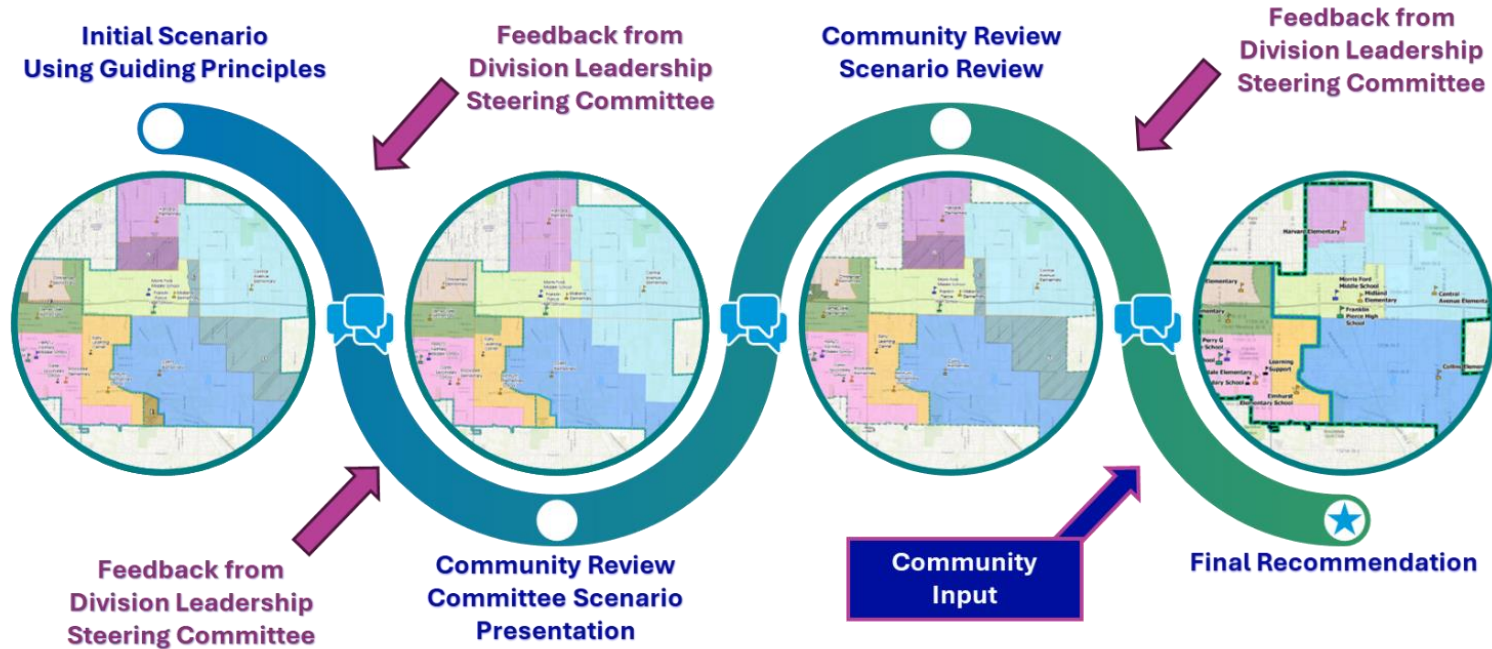

MGT Consultants Update

- Data Collection
 - Current Attendance Boundaries have been mapped
 - Study Areas are currently being created
 - Birth Rate Data
 - Birth totals for years 2020, 2021 & 2022
 - Looking into the availability 2023 data
 - Development Data
 - Received and initial listing development sites
 - The data is currently being mapped and prepared for phasing
 - Student Data
 - Have collected data for 2021, 2022 & 2023

Community Engagement
