Natomas High School: Digital Media Pathway

WHAT IS THE DIGITAL MEDIA PATHWAY?

Are you an artistic person? Do you enjoy photography or designing your own graphics? Do you enjoy using state-of-the-art digital photography and filming equipment? If any of this interests you, the Digital Media Pathway at Natomas High School is a good way to enhance your education.

WHAT CAN I EXPECT?

Students in the Digital Media Pathway will prepare for both college and career by taking courses in Digital Media while also completing core classes -- English, History, Science and Math.

The Digital Media Pathway provides students with the ability to gain and master skills in computer graphics, digital photography, graphic design, digital filmmaking, media arts, photography, and digital photo illustration.

Students gain hands-on experience by working with professional digital media equipment, learning about industry standard techniques, examining career strategies, gaining insight into the importance of job performance, and developing and editing NTV productions.

Students gain practical knowledge in composition, subject treatment, interaction of light and shadow, photojournalism, creativity, image-editing software and output.

Courses also introduce the aesthetic and technical theories and techniques of photography.

To become a Digital Media Pathway student, you must be enrolled at Natomas High School and meet with your counselor to enroll in Digital Media courses.
