

Sierra View Gifted Learner schedule #3

Human Body Systems

*This academy will explore the circulatory, digestive, and respiratory systems in detail to lay a firm foundation for our science standards. Students will enhance their writing and research skills as well as have an opportunity to participate in a *scientific investigation dissection lab.*

***Students are invited but not required to participate in the mammalian dissection lab which focuses on the main organ of each of the three systems we will be studying. In order to be invited to participate in the dissection students are required to have all their work completed and turned in ON TIME. We invite interested parents to contact me Bcombs@ojusd.org**
