

National School Lunch Week was October 14th -18th

Every year, our district joins thousands of districts throughout the country to celebrate National School Lunch Week!

Our dedicated staff celebrated by dressing up and serving great food to your kids!

Students at Cherrydale have an additional reason to be excited about school lunch this year. Under Washington State House Bill 1238, all students at Cherrydale are eligible to receive their first breakfast and their first lunch at school for free—all year long! Hooray!

Pears

Pears originated in Western China and have been cultivated for over 7,000 years. The early Romans developed about 50 varieties of pear and planted them across Europe. Today, pears are found growing all over the world and pear trees can live to be 100 years old!

Pears are full of potassium and antioxidants. Folate and Vitamin C are also found in these great fruits!

Try the smooth, buttery taste of pears with cheeses such as brie or gorgonzola.

This institution is an equal opportunity provider.
