What is the purpose of Title 1?

The purpose of this title is to provide federal funds to qualifying schools to ensure that all children have a fair, equal, and significant opportunity to obtain a high-quality education and to meet or exceed grade level standards on challenging state academic achievement standards and state academic assessments, for staff development, and to build parent engagement to better support their child's educational attainment.

What is Parent/Family Engagement?

Family Engagement is a full, equal, and equitable partnership among families, educators and community partners to promote children's learning and development from birth through college and career.

CT Dept. of Ed.

01

It involves the participation of parents in regular, two-way meaningful and valued communications with school staff that involves the student, addresses learning, and engages the family in school activities.

02

Parent/Family Engagement in a child's education is a greater predictor of academic success than whether or not that family is affluent or poor.

Why does Parent/Family Engagement Matter?

Research tells us that students with engaged parents and families are more likely to:

- Learn to read faster (Exhibit faster rates of literacy acquisition)
- Have higher grades and test scores
- Are promoted and take more challenging classes
- Adapt better to school and have better attendance
- Have better social skills and behavior
- Graduate
- Go on to community/technical college or university

“An effective, school-family community collaboration assures parents, families, and community members the opportunity to effectively work together and participate in making decisions at all levels in support of improved academic performance for all students.”
