

STRATEGIC PLANNING PROCESS 2024-25

What is Strategic Planning?

The School District of Haverford Township will embark on a strategic planning process that will shape the district's path over the next 3 to 5 years. This initiative will involve a thorough review of our district's mission and vision, guided by the latest insights on how students learn and the experiences that best support their growth. Through this process, we will establish clear goals, objectives, and an actionable plan to ensure we achieve our vision for the future.

Community Engagement

- Our school community will have the opportunity to share their opinions and ideas via surveys, including parents/guardians, students (grades 5-12), staff, and community members in October and November.
- 1:1 In-depth conversations with the facilitator and school and district leaders in November.
- Parents/Guardians and staff members will have the opportunity to participate in virtual and/or in-person focus groups in December.

Analyze Input

Perform a comprehensive analysis that includes a review of our district's mission and vision.
The input provided by our community and relevant research will be analyzed to establish priority areas for the plan.

Develop Goals

Set well-defined, measurable, and achievable goals that reflect the district's mission and guide decision-making to improve educational quality and student success based on data and input from the above-mentioned focus groups, surveys, and conversations.
From January to April, teams of staff and administrators will research each goal area and design action plans.

Implement Strategic Plan

Share the finalized goals with all staff, ensuring teachers, administrators, and support staff understand their roles in achieving the objectives.
Present the goals to parents/guardians, students, and the community through public forums, newsletters, and the district's website.
