

Building Blocks

Hands-On Coding and Engineering Activity Series

Building Blocks is one of Cal Poly SWE Robotics Outreach programs that introduces elementary students to topics such as computer science and electrical engineering! To maintain our infamous “learn by doing” element in this program, the students will solve fun coding and Arduino simulation challenges with the help of current Cal Poly engineering students.

November 16th, 2024 from 9:00 am- 11:00 am at the
Cal Poly Engineering Building 192.

Parents/guardians will be required to stay on campus with their student but will be participating in a separate information session/tour hosted by SWE.

If you are interested in participating in this event, please sign up by scanning the QR Code. If you can't make it to the fall quarter event, no worries! Please still fill out the form above hopefully your student can attend the winter or spring quarter event.

Questions, concerns, or suggestions, please feel free to reach out to Maddie Howard, the Robotics Outreach Chair for Cal Poly SWE at cpswerobotics@gmail.com.
