

Proposal C-8

Proposal submitted by Dino Petrovic to relieve overcrowding at Marjory Stoneman Douglas High School for the 2023/24 school year and beyond.

Phase-in Area "A" from Marjory Stoneman Douglas High School to Coral Glades High School, so that students who reside in the impacted area and attend Marjory Stoneman Douglas High School in the 2022/23 school year will continue to be assigned to that school through their 12th grade year, and any high school students residing in the proposed boundary change area but not attending Marjory Stoneman Douglas High School in the 2022/23 school year will be assigned to Coral Glades High School beginning in the 2023/24 school year. Younger siblings of current Marjory Stoneman Douglas High students will be permitted to attend as well by reassignment.

Transfer Area "B" from Marjory Stoneman Douglas High School to Coral Springs High School. No students currently reside in this area.

Proposal Number	C-8
Submitted By	Dino Petrovic
Date Submitted	October 10, 2022
Schools Involved	Marjory Stoneman Douglas High, Coral Glades High, Coral Springs High
Description	Phase-in the portion of the Marjory Stoneman Douglas High boundary south of the Sawgrass Expressway, west of Coral Ridge Drive, and north of Wiles Road (TAZ 56) to Coral Glades High. Younger siblings of current Marjory Stoneman Douglas High will be permitted to attend through reassignment. Also, transfer the portion of the Marjory Stoneman Douglas High boundary at the southwest corner of the intersection of West Sample Road and University Drive, bounded on the west by Northwest 94th Avenue, and on the south by Northwest 32nd Street, to Coral Springs High (in TAZ 653). This area is currently non-residential but is the site for a planned 712-unit multifamily housing development.
Class Size Impact	No adverse impact.
Level of Service Impact	Is projected to enable Marjory Stoneman Douglas High to meet the LOS target by the end of the phase-in.
Enrollment Impact	No adverse impact: moves 362 students from Marjory Stoneman Douglas High to Coral Glades High, which will have sufficient space if future reassignment awards are reduced. Enrollment impact on Coral Springs High from the transfer of the area in TAZ 653 cannot be estimated at this time.
Diversity Impact	Does not change the overall percentage of population of any demographic subgroup beyond +/-5% within the total school population of Marjory Stoneman Douglas High or Coral Glades High. (See diversity data below)

Feeder Pattern Impact	Splits the elementary to high school feeder pattern: Eagle Ridge Elementary currently feeds 100% to Coral Springs Middle and then to Marjory Stoneman Douglas High; proposal would feed to both Marjory Stoneman Douglas High and Coral Glades High. Also, moving the area at the southwest corner of West Sample Road and University Drive to Coral Springs High further splits the middle to high school feeder pattern (though no students currently reside here): Coral Springs Middle currently feeds to both Coral Glades High and Marjory Stoneman Douglas High; proposal would add Coral Springs High as a third school in the feeder pattern.
School Proximity Impact	Students in TAZ 56 would travel further to get to Coral Glades High School; <u>205</u> ~~some~~ students in TAZ 56 live within the two-mile walk boundary of Marjory Stoneman Douglas High and will need bus transportation. The proposed housing development in area "B" (no students currently live in this area) is within the two-mile walk boundary of Coral Springs High. <u>REVISED 11/2/2022</u>
Neighborhood Integrity Impact	Does not split any neighborhoods.
Natural Barrier Impact	No concerns.
