

In 2006, local voters overwhelmingly approved Measure C, a G.O. School Facility Bond, with 65.6% of the vote. Measure C has provided over \$275 million for facility improvements at all Fontana Unified School District (FUSD) school sites.

Measure C Bond Program Nears Completion

Over the last 16 years, FUSD has been good stewards of Measure C funds, stretching dollars and successfully refinancing the first two issuances to produce over \$100 million in savings. While most funds have already been spent on facility improvements and upgrades, there is still about \$67 million in bond funds remaining to complete projects across our community.

Progress on the Measure C School Improvements Bond Program

Proposed design for new elementary school

Measure C Citizens’ Bond Oversight Committee

All projects funded by Measure C are subject to independent citizen oversight. The District has remained committed to transparency during the completion of these projects and wants to demonstrate to the community that facilities improvement funds are being spent properly. The Citizens’ Bond Oversight Committee has verified that all funds have been spent as voters intended.

Measure C Funds at Work

Permanent Classrooms for Student Learning

FUSD is in the process of completing a campus expansion at Sierra Lakes Elementary School, which will add a two-story classroom building to replace aging portables. A similar project to modernize student learning facilities is underway at Fontana Middle School where a two-story classroom building is being replaced to meet modern learning standards.

New Middle School at Citrus & Casa Grande

In recent years our community has continued to grow, with new housing under development and new families moving in. To prevent overcrowding and ensure all students have access to small classes and high-quality academic instruction, FUSD is in the process of constructing a new middle school, which will meet the growing needs of our District and provide Fontana students with personalized learning in modern classroom facilities.

For more information about Fontana Unified School District and current improvement projects underway, please visit www.fusd.net or call (909) 357-7521.

Additional Facility Improvements Underway

In addition to bond funding, FUSD has been highly successful in leveraging developer fees, grants and federal funding to complete additional necessary improvements across the District.

Student Health Is a Top Priority

The District is currently in the process of replacing aging and deteriorating HVAC systems District wide. This project, funded with COVID relief funds, will improve building air circulation and air quality. Systems in all schools are expected to be updated by November 2024.

Updated Athletic Facilities

FUSD is proud to challenge our students academically and physically. Recent athletic facility improvements will ensure the continued success of our students both on and off the field. Synthetic tracks and turf fields have recently been added or are under construction at Summit High School, Kaiser High School and Fontana High School.

Keeping Pace with Residential Growth

By successfully leveraging developer fees, FUSD will be keep class sizes small on the growing north end of our community through the construction of a new elementary school (TK-5). This school is slated to open in time for the 2025-26 school year.
