

BE IT HEREBY ORDAINED, by the Town Council of the Town of Scarborough, Maine, in Town Council assembled, that the following changes to Chapter 405B Town of Scarborough Site Plan Review, of the Town of Scarborough, Maine, be and hereby is amended, as follows (additions are in underlined in red; deletions are struck through):

## CHAPTER 405B TOWN OF SCARBOROUGH SITE PLAN REVIEW

### V. Site Conditions & Environmental Considerations

Before and during construction, the applicant or developer shall abide by the following conservation, erosion, and sediment control measures as well as the site construction, safety, and hazardous waste standards.

#### **A. Wetland Setbacks and Vegetated Buffers**

All required wetland setbacks and vegetated buffers shall be shown on the proposed site plan or subdivision as required by Chapter 405 Zoning Ordinance Section X.A Wetland Setbacks and Vegetated Buffers or Chapter 405C Shoreland Zoning Ordinance, as applicable.

#### **BA. Conservation, Erosion, & Sediment Control [amended 04/21/2021]**

1. All sites must comply with Chapter 420 – Town of Scarborough Erosion and Sedimentation Control at Construction Sites Ordinance.
2. Stripping of vegetation, re-grading and other development shall be performed in such a way as to minimize erosion.
3. Development shall preserve prominent natural features, keep cut-fill operations to a minimum and ensure conformity with topography so as to create the least erosion potential and adequately handle the volume and velocity of surface water run-off.
4. Wherever feasible, natural vegetation shall be retained, protected, and supplemented.
5. The extent of disturbed area and the duration of exposure shall be proposed by the applicant for consideration by the Applicable Reviewing Authority. The proposal shall conform to time schedules acceptable to the Applicable Reviewing Authority or to the Town Planner and Town Engineer if the Applicable Reviewing Authority so directs.
6. Disturbed soils shall be stabilized as efficiently as possible.
7. Temporary vegetation or mulching shall be used to protect exposed critical areas during development.
8. The permanent vegetation and mechanical erosion control measures shall be installed in conformance with a specified schedule as approved by the Applicable Reviewing Authority or by the Town Planner and Town Engineer if the Applicable Reviewing Authority so directs.

9. Until the disturbed area is stabilized, sediment in the runoff shall be trapped and contained by the use of debris basins, sediment basins, silt traps, silt fencing or other acceptable measures.
10. Whenever sedimentation is caused by stripping vegetation, re-grading or other development, it shall be the responsibility of the developer causing the sedimentation to remove it from all adjoining surfaces, drainage systems and watercourses and to repair any resulting damages in an efficient manner.
11. Any developer conducting an activity on or across a stream, watercourse or swale or upon a floodway or right-of-way thereof shall maintain, as nearly as possible, the state of the stream, watercourse, swale, floodway or right-of-way during the activity. Following the activity, the water feature shall be returned to its original, or equal, condition.
12. Maintenance of drainage facilities or watercourses originating and completely on private property is the responsibility of the owner to the point of open discharge at the property line or at a communal watercourse within the property.

### **CB. Site Conditions**

1. During construction, the site shall be maintained and left each day in a safe and sanitary manner. Any condition which could lead to personal injury or property damage shall be immediately corrected by the developer upon order by the Code Enforcement Officer or other authorized personnel. The developer shall make provisions for the disposal of oil, grease, and any other materials or equipment which may pose a threat to public health and safety. The site shall be regularly sprayed to control dust from construction activity.
2. Developed areas shall be cleared of all stumps, litter, rubbish, brush, weeds, dead and dying trees, roots and debris, and excess or scrap building materials. Such material shall be removed or destroyed upon the request, and to the satisfaction, of the Code Enforcement Officer and must be accomplished prior to the issuance of an occupancy permit.
3. No substantial change shall be made in the elevation or contour of any lot or site by the removal or addition of earth, except as shown on an approved site plan. Minimal changes in elevations may be made only after approval by the Code Enforcement Officer. All permitted changes necessitated by field conditions shall be shown on the as built plans.
4. Prior to or during construction, the Code Enforcement Officer may require the installation or construction of improvements in order to prevent or correct a temporary condition on the site that could cause personal injury, damage to property, erosion, flooding, heavy construction traffic, creation of steep grades, or pollution. Required improvements may include berms, mulching, sediment traps, detention and retention basins, grading, plantings, retaining walls, culverts, pipes, guardrails, temporary roads, and other improvements specific to a condition. All temporary improvements shall remain in place and operation until otherwise directed by the Code Enforcement Officer.
