

HELP KEEP ALL BAEC

STUDENTS SAFE

Recently, we have noticed a bit of impatience with student drop off at the elementary center. Some drivers are skipping the line after their child exits their vehicle; they drive around the other vehicles and exit. **THIS CREATES A SAFETY CONCERN** and we do not want a student to get injured or an accident to occur. The expectation is that all cars remain in a single line as they proceed through the traffic circle. We know that occasionally it takes a few minutes to finally exit the circle as those in front of you may need to momentarily assist their child(ren). Please be patient, and observe the following:

- Parents/trusted adults who drive elementary students to school must utilize the traffic circle to the front side of the school to drop off students.
- Parents/trusted adults are not to exit their vehicle to walk the student(s) to the entrance of the school.
- Parents/trusted adults may momentarily exit their vehicle to unbuckle/release their children from their car seats, etc., but we ask that every care is taken to do this as safely and quickly as possible so that traffic does not back up unnecessarily. We understand the desire to hug your children as you send them on their way into school, however, if every parent does this, it will create an unnecessary back up. **Please establish a personal drop-off routine that is as efficient as possible; ideally by not getting out of your car at drop off.**
