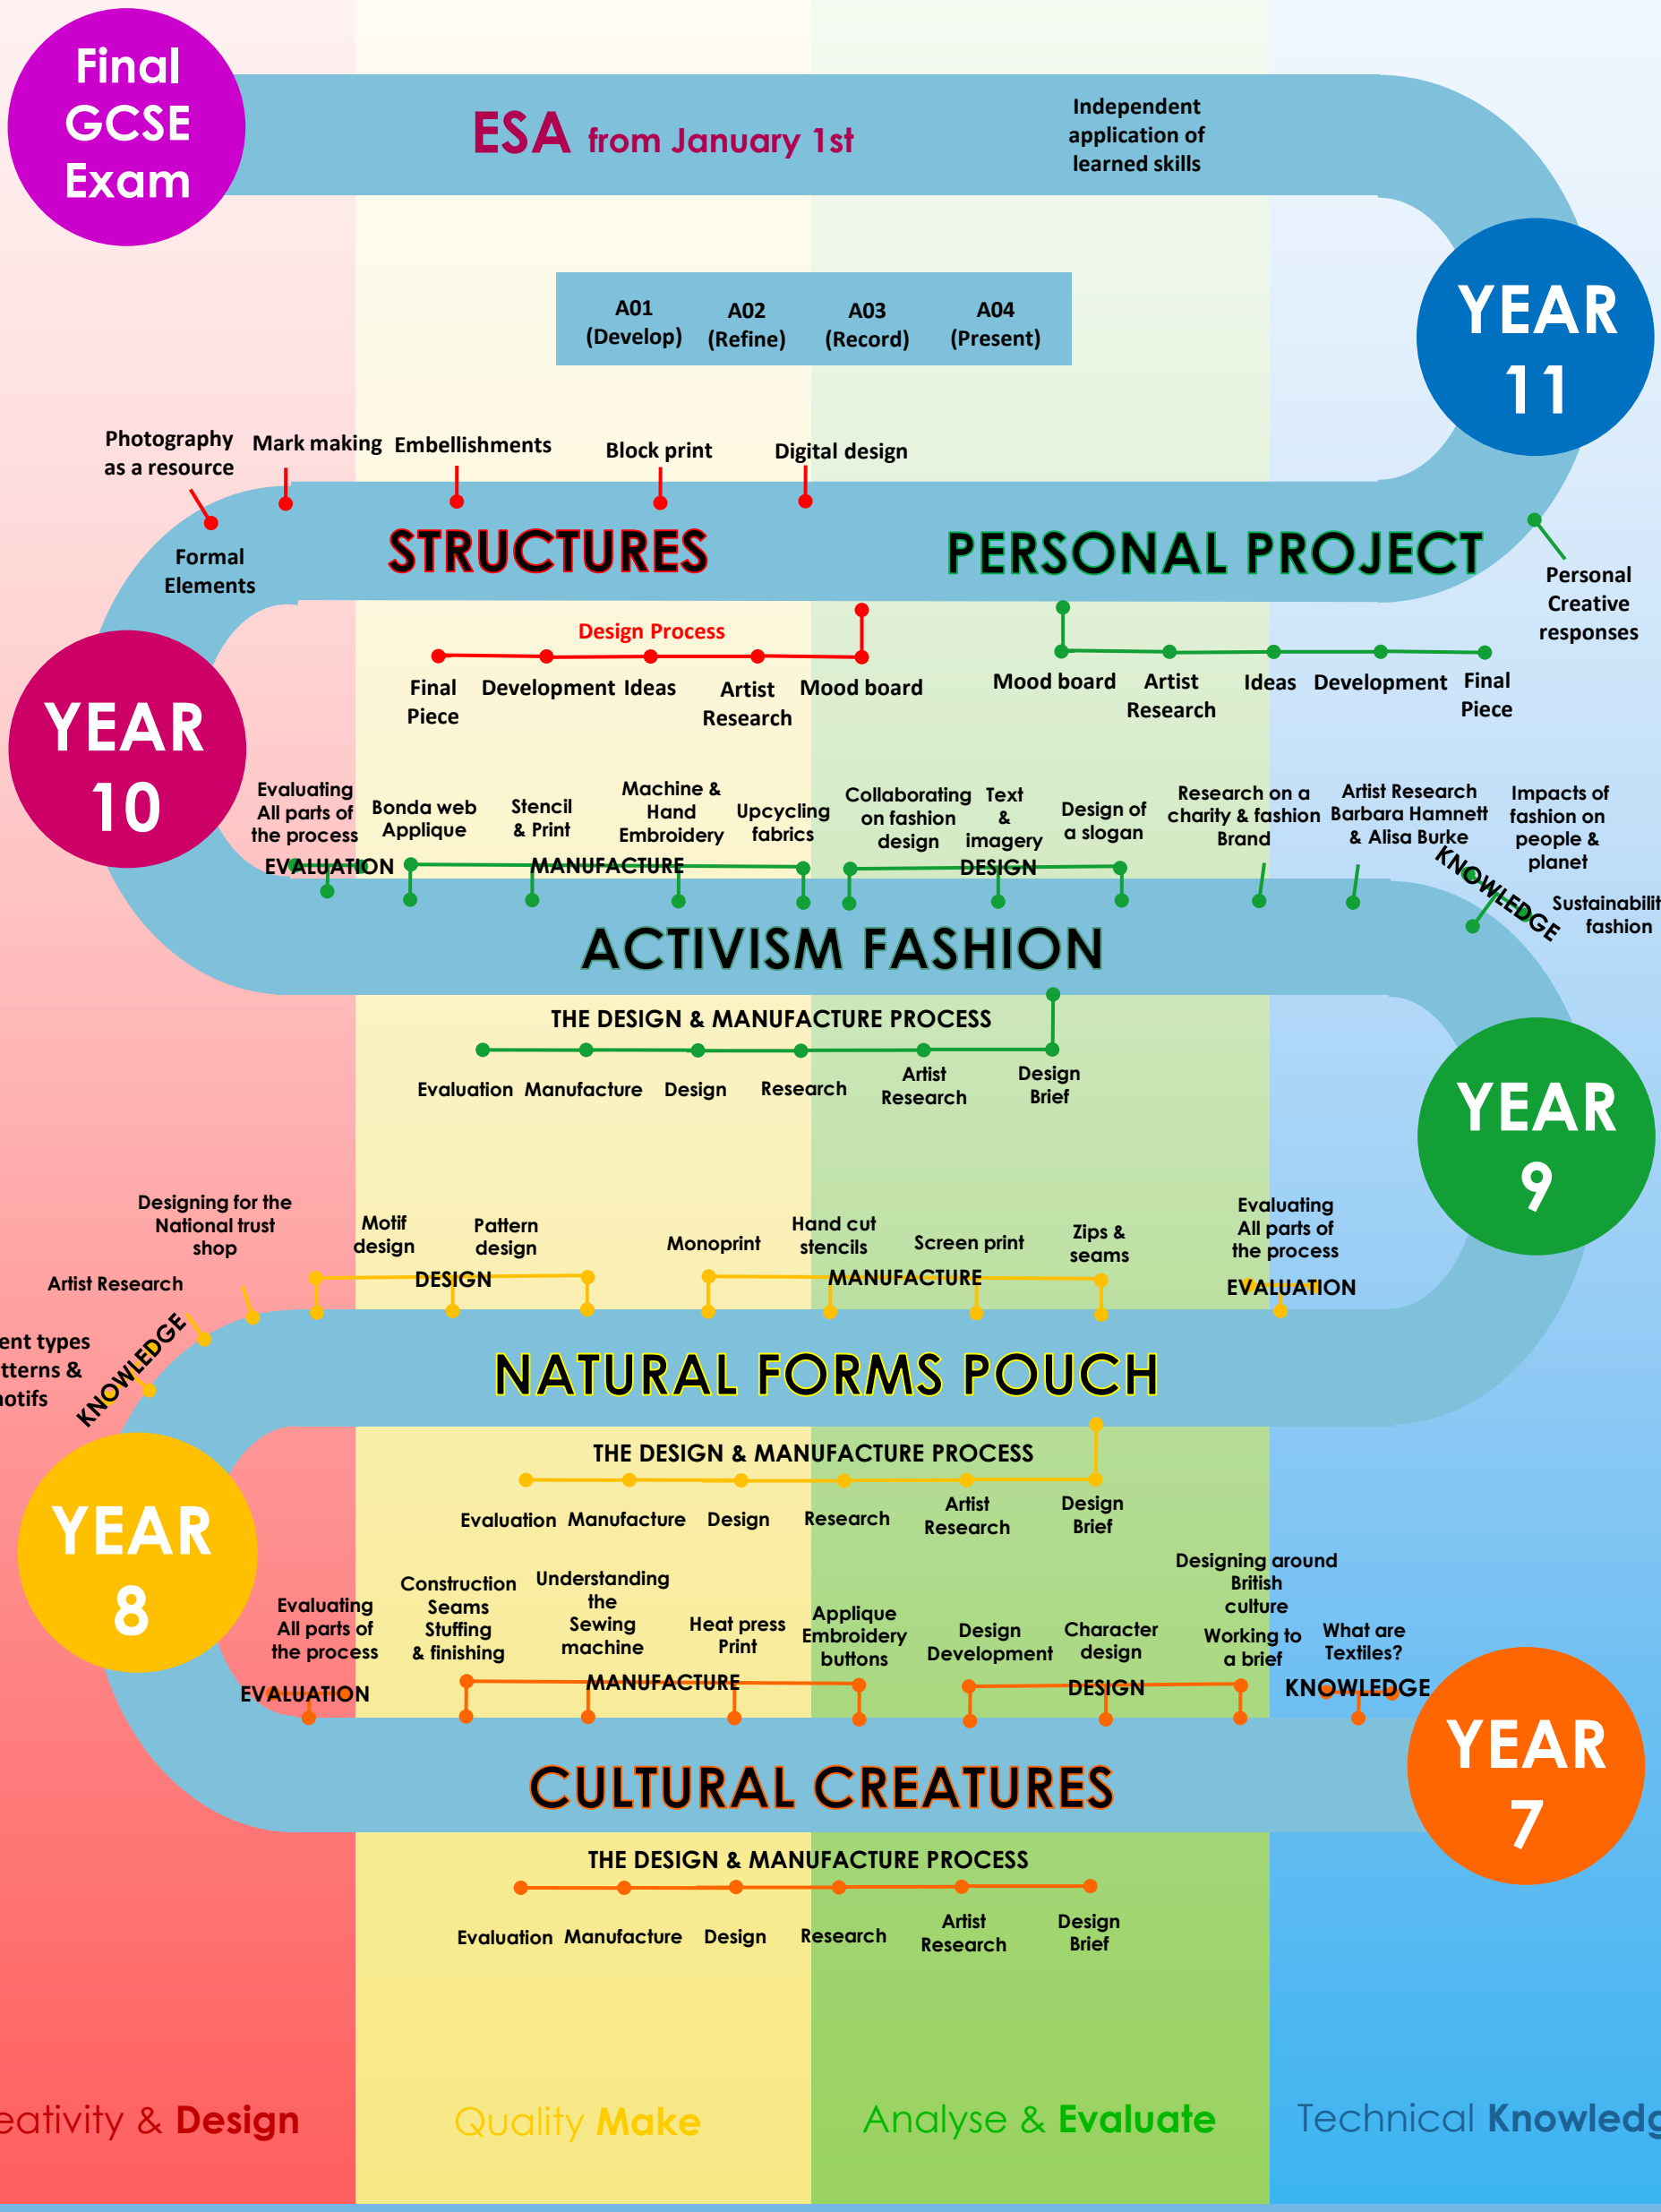
SUBJECT LEARNING JOURNEY
TEXTILES

INTENT

Within our Design Technology Department (DT, Food and Textiles), students are able to blend the creative and the practical using ingredients and materials to solve genuine, relevant problems within different contexts whilst considering their own and others' needs, wants and values. We encourage the development of high skills and resilience in a safe environment, allowing students to demonstrate commitment and act on feedback.



IMPACT

What is the impact of studying our subject?

We provide a creative and practical experience that fosters a love of learning. Students will develop the ability to interpret artists' work and apply their knowledge throughout their own work. We immerse our students in a vast array of creative techniques and processes to develop their skills and build confidence.
