Survivor: Stone Age Edition

Would you survive the Stone Age? Well our 7th graders tried to in what has become an annual right of passage! Students were challenged to construct their own stone tools using only materials that would have been available during the Stone Age. They may never look at a rock the same way again!

SUMNER ACADEMY

VISION | PASSION | DEDICATION

Campus Highlights

One student in the 7th grade group was able to weave a basket from the iris leaves in our front garden. It was strong enough to hold a hardy harvest for the group!

Despite the lack of rain, the Moon Tree continues to grow!

SA ROBOTICS: SUBMERGED

**FIRST
LEGO
LEAGUE**

This year, the robotics team will be diving deep into engineering challenges faced by ocean explorers! The First Lego League Robotics season: Submerged has kicked off and our teams are hard at work assembling mission models, coming up with innovative project ideas, and working together to solve this year's challenging robot missions. Stay tuned to watch their progression through the season!
