		The proposed scope of work is to bring power to an existing detached garage located at the northwest side of the property to operate lights, tools and the garage door. The project will require a trench, depth of 18", to facilitate PVC conduit, with an approximate 56' of run according to the parcel map, to get from the detached garage to the building. Additionally, it is the intent of the home owner to comply with NEC standards set forth for residential construction. Furthermore, the electrical will be connected to an existing Square D, 100 AMP sub panel, on a spare 30 amps circuit breaker, located in the basement at the property.
