

Learning Enrichment Resources TK - 2

Romoland School District is providing flexible learning options and resources in support of the varying needs of students and families. This has multiple, flexible formats: online learning, offline learning, or a combination of both. All of our schools have taken steps to support student learning at home through the use of web-based educational tools and programs. In addition, the District has weekly grade level packets available online (printed packets are available for pick up at the District Office on Mondays).

Teachers have been asked to provide students with support and feedback throughout this time of school closure. Teachers may support student learning with use of the digital tools we currently have in our schools, such as [Google Classroom](#) or Class Dojo. Additionally, teachers have been asked to be responsive to email and inquiries from students and parents/guardians intermittently throughout the times of a regular school day schedule.
