

STANWOOD-CAMANO SCHOOL DISTRICT

CTE COURSE EQUIVALENCIES

While some graduation requirements must be met by successfully completing specific courses, many requirements may be met successfully by completing district approved equivalency courses. The following are approved high school CTE equivalency courses that may be used to meet more than one graduation requirement. While these equivalencies will meet district graduation requirements, they may not satisfy college admission requirements in all cases. Students should check with individual colleges regarding the use of particular equivalency courses. Students wishing to have a CTE course listed on their transcript as the equivalent academic course will need to turn in an Equivalency Request Form to the CTE Office.

Each of these courses automatically meet one of the graduation requirements listed for a course based on a student's particular credit needs. A student can request to have an equivalency course satisfy two graduation requirements listed for the course by completing and submitting an Equivalency Request Form to the school counseling office. It is important to understand that while an equivalency course may satisfy more than one graduation requirement, no course can be worth more than the total amount of credit it has been assigned.
