Hello,

This letter is to inform you that based on our recent service line inventory, the water service lines through our school district connecting to the public water main is confirmed to be made of Non-Lead material, by physical inspection.

What this means:

- The drinking water is not currently at risk of elevated lead levels due to the composition of the service lines.
- No special actions to reduce lead exposure from the drinking water is needed at this time.

If you have any questions about the service lines material or concerns regarding the drinking water, please contact the maintenance manager Jim Dienstel, jdienstel@pleasanthill.k12.or.us

Sincerely,

Pleasant Hill School District
