## **Health and Human Services Agency**

Food Safety Program

In the food safety program we are responsible for the enforcement of laws and regulations regarding all food facilities which serve food to the public. We carry out this responsibility by inspecting permanent, mobile and temporary food facilities. We investigate complaints, review and approve food facility plans

for compliance with state laws and work closely with food facility operators to ensure compliance with the states minimum food safety standards. The purpose of the program is to protect the public from food borne illness and to insure that food being served to the public is unadulterated and from an approved source.

# Module 6 - Food Safety and Sanitation

### **Target Audience**

- Executive Directors/Authorized Representative
- SFSP Administrators/Directors
- Site Supervisor/Manager
- Site Monitor

### **Estimated Time Required**

30 minutes

### **Objectives**

- Provide guidance to ensure proper temperatures are maintained for food served and food stored
- Provide guidance to ensure safe food handling (cross contamination, hand washing, and hygiene)
- Provide guidance on the required documentation that must be maintained to ensure proper safety and sanitation procedures

#### **Tasks**

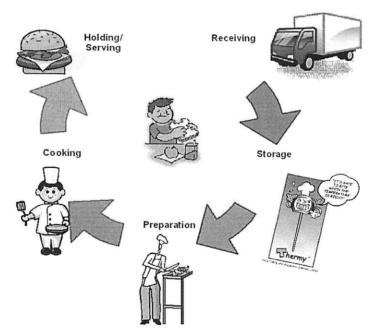

- Read materials
- Review Web sites and resources
- Complete and submit online quiz

## **Responsibilities**

It is the responsibility of the sponsor to ensure that the current California Retail Food Code—Cal Code (formerly California Uniform Retail Food Facilities Law-CURFFL) requirements are followed at the site(s). The California Department of Education (CDE) refers all sponsors to their local Environmental Health Department, as there may be additional specific county-level requirements regarding the type of health permits required.

Review the current California Food Code-Cal Code for areas critical to food safety programs at <a href="http://www.cdph.ca.gov/services/Documents/fdbRFC.pdf">http://www.cdph.ca.gov/services/Documents/fdbRFC.pdf</a>

### Safe Food – From Receiving to Serving

All steps from receiving to serving must be carefully monitored to ensure food is maintained in the proper temperature ranges. This requirement is relevant to all sponsors whether you are a self-preparation or vended site.

# **Basics for Handling Food Safely**

Safe steps in food handling, cooking, and storage are essential to prevent foodborne illnesses.

Follow the four "Fight Bac!" Guidelines to keep food safe:

Clean - Wash hands and surfaces often.

- Hand washing is one of the most critical aspects of good personal hygiene in food service. Clean hands are necessary to prevent contamination of food during preparation and service.
- Always wash hands frequently and properly with warm, (at least 100 degrees F), running water and soap for a total of 20 seconds (with 10-15 seconds of vigorous scrubbing) before and after handling food. Use a separate sink to wash hands, not a sink used for food preparation or dishwashing. Always wash hands after touching hair or face, coughing, sneezing, eating or drinking, handling chemicals, or taking out the garbage.
- No bare-hand contact with ready-to-eat food. Clean disposable gloves must be worn and changed as necessary.

Separate - Do not cross-contaminate.

- Cross-contamination is a common cause of foodborne illness. Hand-to-food cross-contamination occurs when contaminated hands handle cooked or readyto-eat foods.
- Never touch ready-to-eat foods with your bare hands; if possible, wear clean, disposable plastic gloves.
- Wash utensils and food preparation areas before and after handling each food item and before working on the next food item.

**Cook** – Cook foods to proper temperatures and observe critical control points.

- Be sure thermometers are available and use them properly. Calibrate thermometers on a regular basis. Monitor and record all temperatures on a temperature log.
- Cook foods to minimum required internal temperatures for food safety and observe critical limits.
- After reaching the proper internal cooking temperature, hold all hot food at 135°F or above.

# Summary Chart for Minimum Food Cooking and Holding Temperatures 2013 FDA Food Code

Food	Minimum Temperature	Minimum Holding Time as the Specified Temp.
Poultry; Balut; Stuffed Fish; Stuffed Meat; Stuffed Pasta; Stuffed Poultry; Stuffed Ratites; Stuffing Containing Fish, Meat, Poultry, or Ratites Wild Game Animals	165°	15 seconds
Raw Eggs not prepared for immediate service	158°	< 1 second
Comminuted Commercially Raised Game Animals and Exotic Species of Game Animals	155°	15 seconds
Comminuted Fish and Meats Injected Meats	150°	1 minute
Mechanically Tenderized Meats	145°	3 minutes
Raw Eggs prepared for immediate service Commercially Raised Game Animals and Exotic Species of Game Animals Fish, Pork, and Meat (not otherwise specified in this chart)	145°	15 seconds
Food Cooked in a microwave oven	165°	Hold for 2 minutes after removing from microwave oven

**Chill** – Properly cool foods, promptly refrigerate, and observe critical control points. Bacteria spread fastest at temperatures between 41°F and 135°F (temperature danger zone), so chilling food properly is one of the most effective ways to reduce the risk of foodborne illness.

- Critical limit: Hold cold foods at 41°F or below. Check and record temperatures.
- Keep frozen food in a freezer at 0°F or lower.
- Cool hot food from 135°F to 70° within two hours and from 70°F to 41°F or below within four hours. Divide into smaller batches and use an "ice bath" to cool the food rapidly. Do not allow any foods to cool at room temperature.

#### NEVER PLACE HOT FOOD IN THE REFRIGERATOR

- Refrigerate and freeze properly cooled leftovers in covered, shallow two inch deep or less containers. Label and date all leftover or prepared food.
- Do not thaw frozen foods at room temperature; thaw in the refrigerator.

# **Temperature Range**

Hot food must be kept at 135° or above and cold food must be kept at 41° or below to prevent harmful bacteria from growing .

### **Daily Temperature Log**

To keep food safe, fresh, and appetizing, food temperature must be maintained during storage, preparation, and serving.

Temperature logs should be posted on refrigerators, freezers, and dry storage areas and maintained on a daily basis.

A sample Temperature Log is available in the Child Nutrition and Information Payment System (CNIPS) "Download Forms" section.

In addition, Temperature Log forms can be found in the USDA SFSP Nutrition Guide on USDA's Web page at <a href="http://www.fns.usda.gov/sfsp/handbooks">http://www.fns.usda.gov/sfsp/handbooks</a>.

Below is a picture of sample food temperature log from in the USDA SFSP Nutrition Guidance Manual.

## **Using a Food Thermometer**

Using a food thermometer is the only sure way to tell if the food has reached a high enough temperature to destroy harmful bacteria. Always check the temperature of foods to make sure that they are thoroughly cooked and foods are maintained within proper holding temperatures.

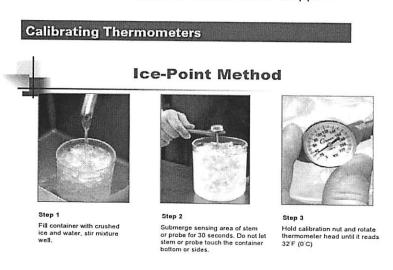

### **General Thermometer Guidelines**

When using thermometers:

- Clean and sanitize after each use
- Calibrate them regularly
- Insert the thermometer stem or probe into the thickest part of product
- Wait for the reading to stabilize before recording temperature
- Never use mercury or spirit-filled glass thermometers to check food temperature

### **Calibrating Thermometers**

The ice-point bath is the most widely used method to calibrate thermometers. It is a very quick and convenient way to check the accuracy of your thermometers. Calibrate thermometers at least once a week. The thermometer must be recalibrated if dropped.

### **Temperature-Measuring Devices**

### **Common Types of Thermometers**

Photos courtesy of Cooper-Atkins Corporation

**Bimetallic Stemmed Thermometers** – Measures temperatures through the metal stem. Foods must be thick enough to insert the stem up to the dimple.

Thermocouple and Thermistor Thermometers – Measure temperatures though a metal probe. Temperatures displayed digitally. Sensing area is located in the tip. Good for measuring thin foods such as hamburger patties.

Infrared Thermometers - Measures temperatures of food and equipment surfaces only.

For more information, refer to:

Management Bulletin-NSD-SFSP-01-2008 Temperature Controls of Potentially Hazardous Food on CDE's NSD's Web page at <a href="http://www.cde.ca.gov/ls/nu/sf/mbnsdsfsp012008.asp">http://www.cde.ca.gov/ls/nu/sf/mbnsdsfsp012008.asp</a>.

The USDA SFSP Nutrition Guidance Manual has a chart of food safety rules and a Food Safety Check List located on the USDA's Web page

at http://www.fns.usda.gov/cnd/summer/library/handbooks.html.

Serving it Safe training resource, Food Safety Checklist, is located on National Food Services Management (NFSMI) Web site

at http://www.nfsmi.org/documentlibraryfiles/PDF/20100204085529.pdf.

## Food Safety with Sharing Table or Goody Box

Sponsors may designate a "sharing table" or "goody box" where children may return whole, unopened, or prepackaged items that they choose not to eat. These food items are then available to other children who may want additional helpings. If you are using a sharing table or goody box, ensure proper food temperatures are maintained at all times.

Be sure to check with local environmental health department to make sure this procedure complies with your county's enforced rules.

For more information, refer to Management Bulletin-NSD-SNP-05-2008 Clarification Regarding the Use of Sharing Tables on CDE's NSD's Web page

at http://www.cde.ca.gov/ls/nu/sn/mbnsdsnp052008.asp and Management Bulletin-USDA-

CNP-04-2012 Guidance on the Donation of Leftover Food

at http://www.cde.ca.gov/ls/nu/sn/mbusdacnp042012.asp

## **Food Safety and Transporting Meals**

If you are transporting food to outdoor sites, consider using refrigerated trucks and/or warmers. Proper temperature maintenance is necessary and must be observed if food is to be transported. Review temperatures taken prior to delivery and consider the time until meals will be served when accepting delivered meals.

Food temperatures and time of day must be taken and recorded:

- Before leaving the vendor's or sponsor's central kitchen
- Upon arriving at the site
- Prior to service

Transport cold meals in clean ice chests or clean insulated food carriers with ice or ice packets, or refrigerated trucks. Please refer to Management Bulletin on CDE's NSD's Web page at <a href="http://www.cde.ca.gov/ls/nu/sn/mb02134.asp">http://www.cde.ca.gov/ls/nu/sn/mb02134.asp</a>.

- Transport hot meals in clean hot packs or clean insulated food carriers.
- Ensure meals are not delivered more than one hour prior to the approved serving time
  of meal.

A sample transport record is available in the Child Nutrition and Information Payment System (CNIPS) "Download Forms" section.

As defined in § 225.16 (a), Sponsors are required to submit, annually, to the State agency a copy of their letter advising the appropriate health department of their intention to provide a SFSP food service during a specific time period and at specific sites.

## **Program Staff**

Your Summer Food Specialist at the Nutrition Services Division is the best resource for questions about SFSP requirements. The SFSP staff Contact List and County Assignments is found in the Download Forms section of the CNIPS online application as SFSP 01.
