**PATIENT CARE**  
PATHWAY

# PATIENT CARE

This is the pathway for you if you...

- ✦ Are interested in the health sciences
- ✦ Want to understand how the human body works
- ✦ Want to learn how to save someones life
- ✦ Are interested in going into the Healthcare field
- ✦ Would like to learn CPR and how to use a tourniquet

“

## Patient Care

is an incredible course for all students. You don't have to want a career in the health care field, you just need to have an interest in learning about health, anatomy and life saving techniques!

”

WHERE THE MAGIC HAPPENS...  
AND CAREERS BEGIN!

# COURSE SEQUENCE

1

## MEDICAL TERMINOLOGY

Students will be introduced to Health Sciences and Medical Terminology which will provide students with the key background knowledge to continue onto the next 2 years of their pathway. They will also learn about the different systems of healthcare EMS, hospitals and ancillary facilities.

2

## FIRST RESPONDER

Students will learn the anatomy and physiology of the human body, the EMR principles, on-scene safety and precautions. The student will gain practical experience in assessing patients, protocols and procedures for transporting patients, and dealing with medical or behavioral emergencies.

3

## CERTIFIED NURSE ASSISTANT

Students will learn entry level training leading to nurse assistant and home health aide certification. Instruction covers basic nursing skills, medical terminology, basic anatomy and physiology, ethics and safety. Included are classroom, laboratory and clinical experiences.
