

Cardinal City Shirt Makerz

Career Exploration

Students participate in one or more activities that educates them about the rigors and requirements of day-to-day work life in a work setting of their choice (outdoors, in an office, providing customer service, running their own business). Career Preparation

- Students work at all stations in the graphic production room including computers for graphic art image editing , silk screen burning and ink process, curing and drying, embroidery machines, direct to garment printing and printing of paper-based products like posters or buttons. Students have opportunities to work in the fab lab to 3D print from start to finish, sew, heat press, laser etch, etc.

Course Overview

The course introduces students to foundational concepts in printing and modeling, and develops skills in creative problem solving, aesthetic literacy, visual analysis, computer assisted design, and an understanding of design thinking across history and cultures. Course projects focus on the sculptural elements of form, structure, and surface. Each unit within the course touches upon an aspect of one or more of these elements.

Graphic Communications, Health and Safety

This unit is an overview of graphic communications. It consists of two parts: Overview of Graphic Communications and Safety and Health. Students will be able to explain the important role of graphic communications in our technological society today, including the major processes, classification, and opportunity for future employment. Students will have a complete understanding of safety in the classroom and the print shop including:

- 1) read and understand MSDS paperwork;*
 - 2) general housekeeping*
 - 3) operation of equipment.*
- In addition, the student will have read, understood, and signed all appropriate agreements and passed a general safety test with a score of 100%.*

10th Grade

-Students will be enrolled in level 2 capstone course (with aprovedcurriculum that is a-g)
