Next Steps

- Building the “Street Data” into the system to triangulate academic, linguistic, and social emotional needs to better understand how to support each student’s individual needs and ensure success.
- Creating automatic notifications to key stakeholders, such as notifying school leaders if attendance meets a certain threshold.
- Rolling out to more administrators and educators in our district.
- Getting feedback from users to improve and enhance the system.

Cycle of Enhancements

Thank you!

Dr. T. Fulton- Superintendent of Schools
Anthony Lubrano- Assistant Superintendent of Curriculum & Instruction
Melissa Corbett- Director of Curriculum & Instruction
Janet Suarez-Lovett- Supervisor of World Languages, ENL & Bilingual Programs
