Subject: Phase I Environmental Site Assessment, Albee Stadium Renovations Project, Eureka, Humboldt County, California

Dear Paul Ziegler:

Enclosed is our Phase I environmental site assessment (ESA) for Albee Stadium Renovations project, which includes the properties identified as Humboldt County Assessor's parcel numbers [APNs] 005-132-008-000, 005-131-008-000, 005-243-003-000, 005-243-004-000, 005-246-004-000, and 005-121-002-000, and the eastern portions of 011-121-001-000 and 011-131-005-000, located northeast and east of the main Eureka High School campus in Eureka, California (site). Eureka City Schools is completing this Phase I ESA in support of its proposed renovations to the Albee Stadium and its surrounding facilities and infrastructure.

SHN identified no **recognized environmental conditions (RECs)**, as defined in ASTM-International (ASTM) Standard E1527-13 within the Phase I ESA site boundaries. The presence of fill materials, asbestos containing materials (ACM) and lead based paints (LBPs) are business environmental risks. SHN conservatively recommends characterization of soil and groundwater quality prior to site construction if excavated fill materials will not be reused on the site as a best management practice to evaluate the need for worker protection and potential disposal options for excavated soil and groundwater.

SHN's research conducted for the subject property included site reconnaissance, reviews of historical topographic and Sanborn maps, aerial photographs, agency records, and interviews.

If you have any comments or concerns, or if we can be of further assistance, please call me at (707) 441-8855.

Respectfully submitted,

SHN

1.0 Introduction

1.1 Purpose

Between December 2020 and January 2021, SHN conducted a Phase I environmental site assessment (ESA) for the Eureka City School Albee Stadium Renovations project, located northeast and east of the main Eureka High School (EHS) Campus. The proposed construction renovations for Albee Stadium and its surrounding area and infrastructure includes Humboldt County Assessor's parcel numbers [APNs] 005-121-002-000, 005-132-008-000, 005-131-008-000, 005-243-003-000, 005-243-004-000, and 005-246-004-000, and portions of 011-121-001-000, 011-131-005-000 (subject site or site), located in Eureka, California. A location map and a site map showing approximate boundaries of this Phase I ESA are included as Figures 1 and 2, respectively. Eureka City Schools is completing this Phase I ESA in support of its proposed Albee Stadium renovations project.

The purpose of conducting a Phase I ESA is to assess the site, largely based on current circumstances, with respect to the presence or absence in the environment of regulated or hazardous materials, as defined in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) and Department of Toxic Substances Control (DTSC) Title 22 of the California Code of Regulations. This Phase I ESA was prepared in general accordance with ASTM-International (ASTM) Standard Practice E1527-13 for the Phase I ESA process.

This Phase I ESA was conducted in general conformance with the regulations and sections according to the EPA Final Rule pertaining to standards and practices for all appropriate inquiries (AAI). This Phase I ESA addresses the latest landowner liability protections that have evolved as a result of the United States Congress's actions and the U.S. Environmental Protection Agency (EPA) rule that requires the addition of the contiguous property owner and bona fide prospective purchaser defenses related to liability under the CERCLA (or Superfund). The AAI Rule requires the environmental professional to include an opinion regarding additional appropriate investigation, if any, to detect the presence of hazardous substances or petroleum products. This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner defense to CERCLA liability; that is, practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice," as defined in 42 United States Code (USC) 9601 (35)(B).

This report has been prepared on behalf of, and for the exclusive use of, Eureka City Schools, and its designated representatives; furthermore, it is subject to and issued in connection with the agreement with SHN and the provisions thereof.

2.0 Scope of Work

In accordance with ASTM Standard E1527-13, SHN performed the following ESA services in preparation of this document:

- Conducted field reconnaissance of the subject site to look for evidence of existing or potential soil and groundwater contamination, or other potential recognized environmental conditions (RECs).
- Provided color photographs of the subject site (Appendix 1).
- Conducted a survey of the site vicinity to identify businesses or facilities that may use, produce, and/or store reportable quantities of hazardous materials or generate hazardous waste. SHN conducted a perimeter survey of the immediately adjacent properties for obvious signs of potential contaminant migration.
- Reviewed local and regional geological and groundwater conditions in the vicinity of the subject site. Identified existing or proposed municipal infrastructure for the property and vicinity, including potable water, wastewater, and stormwater provisions, as mandated by the ASTM guidelines.
- Examined aerial photographs of the site taken over an approximate 80-year period; reviewed the available United States Geological Survey (USGS) topographic maps, historical business directories, and Sanborn Fire Insurance maps (Appendix 2). Additionally, SHN reviewed the Assessor's parcel maps and other maps of interest. SHN also reviewed other reasonably ascertainable standard sources for developing a continuous site history dating back to the first known development, as recommended by the ASTM guidelines.
- Using the ASTM-designated search radii, SHN reviewed publicly available federal, state, county, and other regulatory agency lists and databases (including Comprehensive Environmental Response Compensation and Liability Information System [CERCLIS], National Priorities List [NPL], and several other federal, Indian, and state listed sites) with known hazardous materials contamination and/or registered underground storage tanks (USTs) that are presently or were previously located on or near the subject property (Appendix 3).
- Reviewed and completed a land use questionnaire (supplied by SHN, Appendix 4). The user of this Phase I ESA is Eureka City Schools. Eureka City Schools completed user and owner questionnaires for the subject site (Appendix 4).
- Reviewed and/or discussed selected regulatory agency files and records that are maintained at the North Coast Regional Water Quality Control Board (RWQCB) and the Humboldt County Division of Environmental Health (HCDEH) to evaluate whether the site or any of the immediately adjacent properties are likely to be potential hazardous materials threat to the subject property.
- Identified and commented on the existence and significance of potential data gaps.
- Identified any RECs (if applicable).
- Provided an opinion regarding the need for additional appropriate investigation.
- Commented on the potential for vapor intrusion, as required by ASTM E1527-13.

3.0 Site Overview

3.1 Location

The site is located at the EHS campus in Eureka, California (see Figure 1). The site consists of APNs 005-121-002-000, 005-131-008, 005-132-008, 005-243-003, 005-243-004, 005-246-004 and the eastern

portions of 011- 121-001 and 011-131-005, portions of which are currently developed in support of EHS academic and athletic programs. The site is approximately 3 miles east of the Pacific Ocean, at a 37-foot elevation above sea level (see Figure 1). The project site is approximately 14-acres in size. The site is within the USGS Eureka 7.5-minute quadrangle, N.W. ¼, Section 26, Township 5 North, Range 1 West, Humboldt Baseline and Meridian with a center point at latitude 40.7900060 and longitude -124.155321. A location map and a site map are included as Figures 1 and 2, respectively.

3.2 Adjacent Properties

North: Immediately north of the site is Cooper Gulch beyond which is 14th Street and residential properties.

East: Immediately east of the site are residential properties.

South: Immediately south of the site is Cooper Gulch beyond which is Buhne Street and residential properties.

West: Immediately west of the site are residential properties and the main EHS campus.

SHN did not observe any evidence of a hazardous release or potential release onto the subject site from the northern, eastern, southern, or western adjoining properties during the January 2021 site reconnaissance. Photographs of the subject site and adjacent properties are included in Appendix 1.

3.3 Site Description

The approximately 14-acre site encompasses two distinct areas of the EHS campus, including areas in and around Albee Stadium and Bud Cloney Field. Albee Stadium and Bud Cloney Field are separated by Del Norte Street, which passes through the project site from east to west. Albee Stadium has been used as an outdoor athletic facility for approximately 74 years. The existing facilities are in an ageing and deteriorated condition. The athletic facilities were developed within Cooper Gulch by filling the valley bottom. The side slopes of the gulch are forested with a mixed stand of conifer which are mostly second growth redwood.

Albee Stadium is bordered by Del Norte Street to the north and forested slopes to the east, south, and west. The forested slopes create varying separation between Albee Stadium and the EHS main campus to the west, and nearby residential development to the east and south. Bud Cloney Field is bordered by Del Norte Street to the south, and forested slopes to the north, east, and west. Apart from several residences located along Del Norte Street, the forested slopes create separation between Bud Cloney Field and nearby residential development to the east and west. To the north of Bud Cloney Field the forested slopes continue to form a small urban forest.

The existing athletic facilities in Albee Stadium include concrete bleachers along the western side of the stadium, a track, grass playing field (football/soccer), and a small field house at the south end of the stadium. A low retaining wall runs along the eastern side of the track. Stadium lighting consists of large reinforced concrete structures behind the bleachers and along the east valley wall slope. The eastern light structures are associated with massive foundations consisting of intersecting wing walls. A softball field is present in the northeast corner of Albee Stadium.

North of Del Norte Street, the existing Agricultural Building and woodshop are located immediately north of Del Norte Street. The existing baseball field is north of these structures and represents the northernmost campus development in Cooper Gulch. The outlet of a 1,500-foot long storm drain located beneath the site occurs just north of the outfield of the baseball field. Cooper Creek (also commonly referred to as Cooper Canyon or Cooper Gulch) flows beneath the subject site for a total length of 1,500 feet, entering a 30-inch diameter storm drainpipe south of Albee Stadium and daylighting north of Bud Cloney Field.

The eastern slope of Cooper Gulch is a smooth continuous valley wall slope of moderate gradient through the entire project area. Although areas of substantial seepage are noted, there are no well-established watercourses on the eastern slope. The western slope of Cooper Gulch is characterized by a drainage canyon that occurs west of the stadium bleachers. The small watershed area associated with this stream suggests it is spring-fed and likely receives substantial runoff from storm drains. The stream drains to an inlet that appears to lead to a lateral extending beneath the bleachers to the main (south to north) storm drain culvert along the axis of Cooper Gulch. Storm drain outlets apparently feed a small impoundment that is present along the west slope at the north end of Albee Stadium. An apparent spring fed stream flows from the western valley wall slope adjacent to the baseball field north of Del Norte Street. This stream also feeds into an inlet that appears to extend to the main storm drain line.

Del Norte Street Primary access to Albee Stadium is provided by a paved drive aisle and pedestrian path along the southern edge of Del Norte Street. Existing fencing surrounding Albee Stadium limits access to the site outside of normal school hours and athletic events. Secondary access is provided by additional pathways and drive aisles from the EHS main campus to Albee Stadium located along the western slopes. Entrance gates are located at access point along the perimeter of Albee Stadium.

Access to Bud Cloney Field is provided by a paved drive aisle and pedestrian path along the northern edge of Del Norte Street. Existing fencing surrounding Bud Cloney Field limits access to the site outside of normal school hours and athletic events. An entrance gate is located near the drive aisle from Del Norte Street.

A site plan is included as Figure 2 and site features are presented in Figure 3.

3.4 Preliminary Title Report

A preliminary title report was not provided. SHN did not review title information for the property in the preparation of this report.

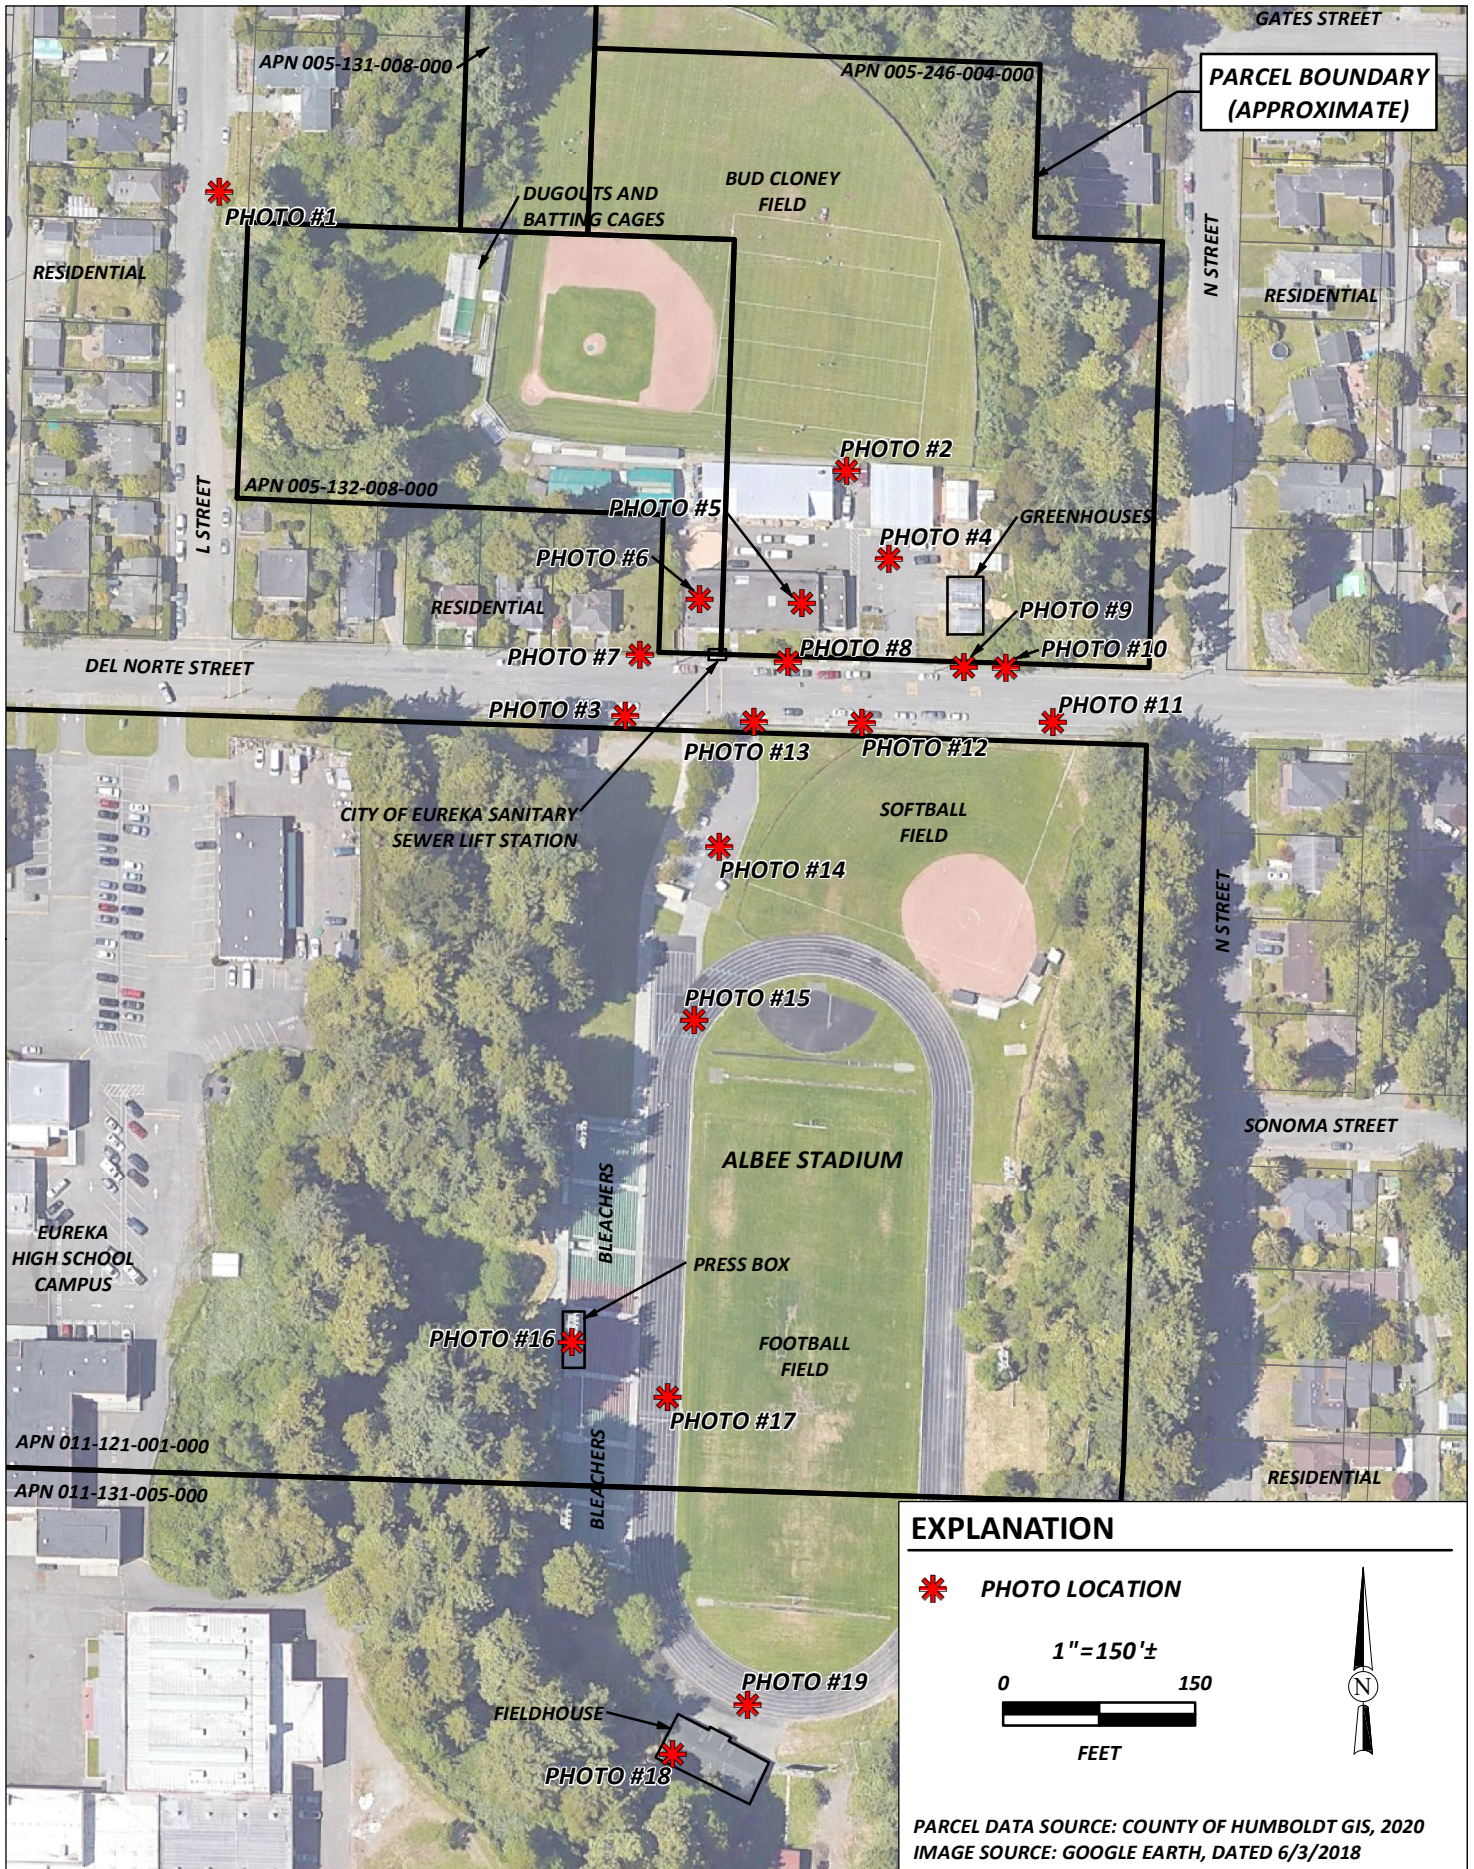

4.0 Site History and Operations

4.1 General Description

Based upon our review of the historical maps, aerial photographs, and a site assessment questionnaire (interview), SHN has summarized the general site history as presented in Table 2.

Path: \\eureka\Projects\2020\020069-EHS-Albee\600-Ph I ESA\GIS\PROJ_MXD\Figure3_SiteFeatures.mxd User Name: mcurran DATE: 2/22/21, 12:18PM

February 2021

Figure3_SiteFeatures

Figure 3

Table 2. Site History
Eureka City School Albee Stadium Renovations Project; Eureka, California

Date	Name and/or Operations	Site Owner(s)
1941	School buildings and Albee Field are shown south of Del Norte Street. No school buildings or developments are shown north of Del Norte Street.	Not Reviewed
Approximately 1954- Approximately 1974	School buildings are constructed on the north side of Del Norte Street and a large area is cleared for a new athletic field. Renovations were made to the school buildings south of Del Norte road and Albee Field stadium bleachers were constructed.	Eureka City Schools
Approximately 1983- Approximately 2005	The athletic field north of Del Norte Street was converted into a baseball field. New additions to Albee Field including a smaller baseball diamond and a new service road were installed.	Eureka City Schools
Approximately 2009-2016	Minor additions to the school buildings south of Del Norte Street and tree removal north of Albee Field.	Eureka City Schools

4.2 Operations Using, Storing, or Disposing of Hazardous Substances

No observation of storage or disposal of hazardous substances or petroleum products was made during site reconnaissance of the subject site.

Eureka City Schools contracted Brunelle & Clark Consulting, LLC (Brunelle & Clark) to complete an asbestos survey and lead-based paint (LBP) screening in four buildings at the site in August 2020. Based on review of the Brunelle and Clark August 2020 reports, asbestos containing materials (ACM) and lead coated paints are present at the site. Laboratory analysis of composite samples for lead waste characterization did not indicate that the material would be characterized as hazardous.

4.3 Description of Environmental Permits Held

The HCDEH regulates hazardous materials storage and use in the county. SHN interviewed Norm Crawford of the HCDEH regarding the site. No environmental permits for hazardous materials storage and/or use for this site were found during the HCDEH file review; nor was information pertaining to the site identified in the historical air board and Certified Unified Program Agency (CUPA) files.

5.0 Environmental Setting

5.1 Regional Physiography

5.1.1 General Physiography

According to the Environmental Data Resources, Incorporated (EDR) report (Appendix 3), the subject site is not included in the National Wetland Inventory (NWI) mapping and is not located within a Federal Emergency Management Agency (FEMA) flood zone (FEMA, 2016).

FEMA Flood Zone: Flood Plain Panel at Target Property: 0600620005C

National Wetland Inventory: Eureka Quad; Yes—refer to Overview and Detail maps (in Appendix 3)

The site is located approximately 1.1 miles south of the Eureka Slough at the State Highway 255 bridge and 1.6 miles east of the Humboldt Bay main channel at the Del Norte pier. The project site is on historically placed loamy fill and native soil materials within the valley forming Cooper Creek. The site was filled to existing grade and installed with an extensive drainage system during original buildout of Albee Stadium and Bud Cloney Field. Cooper Creek flows beneath the project site for a total length of 1,500 feet, entering a 30-inch diameter storm drainpipe south of Albee Stadium and daylighting north of Bud Cloney Field. Cooper Creek continues approximately 1.3 miles north before draining into Eureka Slough and Humboldt Bay.

Steep slopes surrounding Albee Stadium and Bud Cloney Field are dominated with remnant conifer forests. Small channels drain the steep slopes surrounding the project site. Freshwater forested/shrub wetlands occur intermittently in areas along the margins of the existing athletic fields. These wetlands are classified as Palustrine Forested Broad-leaved Deciduous Seasonally Flooded. Figures 2 and 3 (in wetland and other waters delineation report) indicate the jurisdictional wetland boundaries and ordinary high-water mark (OHWM) transects within the project site and surrounding slopes (SHN, 2020).

5.1.2 Tectonic Setting

The site is in a seismically active area. Seismicity in this region is attributed primarily to the interaction between the Gorda and North American plates. Subduction of the Gorda plate beneath the North American plate occurs at the Cascadia Subduction Zone (CSZ) plate boundary. The CSZ is a regional scale thrust fault (megathrust) and lies approximately 50 miles offshore of the Eureka area. The CSZ extends a length of approximately 700 miles from offshore Northern California to southern British Columbia. Rupture of the entire CSZ can produce earthquakes with a maximum moment magnitude (M_w) 9.0 (CDMG/USGS, 1996). Geologic evidence from the Washington, Oregon, and Northern California coasts (such as, drowned coastal forests, buried tidal marshes, and tsunami wave deposits) indicate that great subduction zone earthquakes have repeatedly occurred in the recent geologic past (Personius and Nelson, 2005). A great subduction earthquake along the CSZ would generate long duration, very strong ground shaking at the project site.

The project site is not located within an Alquist-Priolo Fault Hazard Zone (CGS, 2002). No known active fault crosses the project site.

5.2 Soil Conditions

Subsurface materials encountered in Albee Stadium and adjacent Cooper Gulch facilities includes artificial fill, Holocene age alluvium and colluvium, late Pleistocene age marine terrace deposits, and Hookton formation sediments.

SHN prepared geotechnical reports (SHN, 2018 and 2021) for the project site, which concluded the following:

Albee Stadium and adjacent facilities north of Del Norte Street were created by filling the bottom of Cooper Gulch. Based on historic photography, this appears to have been completed in phases, with the development of Albee Stadium pre-dating the development of facilities north of Del Norte Street.

During our investigation, fill soils were limited to flat-lying areas within the project area; significant fill soils were not encountered on the valley wall slopes surrounding Cooper Gulch in the areas under consideration herein.

Fill soils encountered during the investigation are relatively thin at the upstream (southern) end of Albee Stadium, and thicken toward the downstream (northern) end of the project area north of Del Norte Street, consistent with the natural gradient of the valley. At the southern end of Albee Stadium, where the storm drain inlet is visible just below grade, we observed fill thickness on the order of 6 or so feet (boring B-05-20). To the north, borings advanced near the storm drain alignment along the valley axis (B-03-20, B-07-20, B-08-20, from south to north), encountered fill thicknesses of 10, 16, and 21 feet, respectively. As would be expected, fill soils are thickest in the center of Cooper Gulch, and thin toward the valley margins.

Fill soils observed during the subsurface investigation are highly variable, consisting of mostly silty and clayey sands within Albee Stadium. North of Del Norte Street, near the downstream end of the storm drain (this is the outfield of the existing baseball field), fill soils include large quantities of poorly graded sand, which we understand was imported to the site. The fill soils throughout the project area were generally loose, with SPT blow counts typically less than 10. We assume that all the fill soils in the project area were placed without engineering control (that is not placed with verified compaction). We also noted both wood and charcoal within the fill soils, both of which are undesirable and suggest placement of random soils without appropriate screening or control.

5.3 Groundwater Conditions

Groundwater levels were observed to be highly variable across the project site at the time of the 2020 Geotechnical investigation (at the end of the dry season). The groundwater surface was encountered at depths between 10 and 20 feet, although borings near the valley margins encountered groundwater near the ground surface. One boring along the valley axis, near the main storm drain alignment (B-3-20), did not encounter groundwater in the upper 26.5 feet.

Groundwater levels in northern California are typically highly seasonally dependent and are expected to rise during the rainy season.

Spring sources are evident along the Cooper Gulch valley walls surrounding much of the project area, and wet areas are abundant along the margins of much of the site. Existing drainage facilities are extensive, some more effective than others (many older drainage facilities are present). Substantial flow was observed at the end of the dry season in many areas, and wet ground was observed in several areas relevant to proposed project improvements. Specifically, the areas of primary concern related to wet ground were observed adjacent to the west side of Building L, where a concrete access ramp is proposed, on the eastern slope of Albee Stadium, where stadium lighting is proposed, and in the southwestern corner of Albee Stadium, where a potential ramp is being considered (SHN 2021).

6.0 Results of Investigation

6.1 Site Reconnaissance

On January 12, 2021, SHN staff performed site reconnaissance, which consisted of a visual inspection of the subject site, noting potential sources or evidence of any hazardous materials releases, location and

alignment of utilities, site drainage patterns, uses of adjacent properties, potential for migration from offsite sources, and any other pertinent or unusual information that would aid in the development of this Phase I ESA.

Albee Stadium is bordered by Del Norte Street to the north and forested slopes to the east, south, and west. The forested slopes create varying separation between Albee Stadium and the EHS main campus to the west, and nearby residential development to the east and south. Bud Cloney Field is bordered by Del Norte Street to the south, and forested slopes to the north, east, and west. Apart from several residences located along Del Norte Street, the forested slopes create separation between Bud Cloney Field and nearby residential development to the east and west. To the north of Bud Cloney Field the forested slopes continue to form a small urban forest.

The existing athletic facilities in Albee Stadium include concrete bleachers along the western side of the stadium, a track, grass playing field (football/soccer), and a small field house at the south end of the stadium. A low retaining wall runs along the eastern side of the track. Stadium lighting consists of large reinforced concrete structures behind the bleachers and along the east valley wall slope. The eastern light structures are associated with massive foundations consisting of intersecting wing walls. A softball field is present in the northeast corner of Albee Stadium.

North of Del Norte Street, the existing Agricultural Building and woodshop are located immediately north of Del Norte Street. The existing baseball field is north of these structures and represents the northernmost campus development in Cooper Gulch. The outlet of a 1,500-foot long storm drain located beneath the site occurs just north of the outfield of the baseball field. Cooper Creek (also commonly referred to as Cooper Canyon or Cooper Gulch) flows beneath the project site for a total length of 1,500 feet, entering a 30-inch diameter storm drainpipe south of Albee Stadium and daylighting north of Bud Cloney Field.

The eastern slope of Cooper Gulch is a smooth continuous valley wall slope of moderate gradient through the entire project area. Although areas of substantial seepage are noted, there are no well-established watercourses on the eastern slope. The western slope of Cooper Gulch is characterized by a drainage canyon that occurs west of the stadium bleachers. The small watershed area associated with this stream suggests it is spring-fed and likely receives substantial runoff from storm drains. The stream drains to an inlet that appears to lead to a lateral extending beneath the bleachers to the main (south to north) storm drain culvert along the axis of Cooper Gulch. Storm drain outlets apparently feed a small impoundment that is present along the west slope at the north end of Albee Stadium. An apparent spring fed stream flows from the western valley wall slope adjacent to the baseball field north of Del Norte Street. This stream also feeds into an inlet that appears to extend to the main storm drain line.

Del Norte Street Primary access to Albee Stadium is provided by a paved drive aisle and pedestrian path along the southern edge of Del Norte Street. Existing fencing surrounding Albee Stadium limits access to the site outside of normal school hours and athletic events. Secondary access is provided by additional pathways and drive aisles from the EHS main campus to Albee Stadium located along the western slopes. Entrance gates are located at access point along the perimeter of Albee Stadium.

Access to Bud Cloney Field is provided by a paved drive aisle and pedestrian path along the northern edge of Del Norte Street. Existing fencing surrounding Bud Cloney Field limits access to the site outside of normal school hours and athletic events. An entrance gate is located near the drive aisle from Del Norte Street.

A site plan is included as Figure 2. Site photographs are presented in Appendix 1.

Electric service is currently provided by Pacific Gas and Electric through overhead lines and there is a transformer located along the northern side of Del Norte Street immediately south of the agricultural building.

No odor, staining, or sheen was noted at the subject site during the site reconnaissance. No evidence of pits, lagoons, or stained soil was observed during SHN's January 2021 site reconnaissance.

SHN completed a "Site Assessment Questionnaire" following the site walk (Appendix 4).

6.2 Project Vicinity

6.2.1 Historical Use Information on Surrounding Area Properties

There are three sites within a 1/4-mile radius of the subject property that are known or suspected to have stored and/or used regulated materials, and/or have had toxic material releases, including leaking USTs.

Based on the higher elevation of the site to the properties identified in the EDR Radius Report (Appendix 3), the associated releases are unlikely to adversely impact site soil and groundwater due to their downgradient locations and documented constituents of concern.

6.2.2 Sanborn Maps

SHN reviewed Sanborn Maps with coverage of the subject property that were published in 1920, 1949, 1955, 1957, 1958, 1964, 1967, 1969, and 1988 (Appendix 2). A description of the features observed at the site and surrounding properties is presented in Table 3.

**Table 3. Summary of Sanborn Maps with Coverage of the Subject Property
Eureka City School Albee Stadium Renovations Project; Eureka, California**

Year	Description
1920	The site is not shown as developed on the map.
1949	The site is not shown as developed on the map.
1955	The site is not shown as developed on the map.
1957	The school agricultural shop and auto mechanics buildings are shown as constructed north of Del Norte Street, as well as five residential structures which appear in their present-day configurations. The map does not show Albee Field or the school buildings south of Del Norte Street.
1958	Similar to previous map.
1964	Similar to previous map, except that two auto shop mechanic buildings are shown as constructed south of Del Norte Street.
1967	Similar to previous map, except that the mechanic building south of Del Norte Street has been removed.
1969	Similar to previous map.
1988	Two additional buildings labeled as miscellaneous storage have been added north of Del Norte Street, north of the agricultural shop. A playground is labeled east of the agricultural shop. South of Del Norte Street, Albee field has been labeled as an athletic field and includes the stadium bleachers which are shown in their present-day configurations.

6.2.3 Topographic Maps

SHN reviewed topographic maps with coverage of the subject property that were published in 1933, 1942, 1947, 1951, 1958, 1959, 1972, and 2012 (Appendix 2). Individual features of the site and surrounding vicinity are limited on the historical topographic maps. A description of the features observed at the site and surrounding properties is presented in Table 4.

**Table 4. Summary of Topographic Maps with Coverage of the Subject Property
Eureka City School Albee Stadium Renovations Project; Eureka, California**

Year	Description
1933	The northern portion of the site is shown as developed with two school buildings immediately south of Del Norte Street, west of the modern-day location of Albee Field. Albee Field is not shown as being constructed. No school buildings are shown north of Del Norte Street. Cooper Gulch is visible north and east of the site is shown as undeveloped except for a few east-west trending roads. The area west and south of Cooper Gulch is shown as developed and appears residential. In general, building density in the area west of Cooper Gulch suggests it is more densely populated than the area east of Cooper Gulch.
1942	The site is similar to the previous map. Cooper Gulch appears as marshy wetland. Unlike the 1933 map, on the 1942 map individual buildings are not shown.
1947	The site and surrounding vicinity are similar to the 1942 map.
1951	Additional school buildings south of Del Norte Street are shown. The Albee Field outline is shown as well as small buildings constructed around Albee Field and appear in their present-day configurations. The southern and northwest portions of Cooper Gulch are shown as developed.
1958	Additional school buildings have been constructed on the north side of Del Norte Street. Development has further expanded northwest into the Cooper Gulch area, which is now shown as segmented wetland area.
1959	The school buildings on site remain similar to previous versions. However, Albee Field is no longer shown on the map. Cooper Gulch is labeled as Cooper Canyon.
1972	Additional school buildings have been constructed at the site and Albee Field is shown on the map. The stadium bleachers are shown in their present-day configurations. The extent of wetland depicted in Cooper Canyon appears to have decreased in size.
2012	Individual details are not shown on this map.

6.2.4 Business Directory

SHN reviewed the business directories, which were provided by EDR (Appendix 2). The site address, 1915 J Street, was included in all the city directory listings, and all the listings are related to the school.

6.2.5 Aerial Photographs

SHN reviewed aerial photos of the subject property taken during the past approximately 80 years (Appendix 2), which were provided by EDR. A description of the features observed at the site and surrounding properties, from the EDR-provided aerial photographs, is presented in Table 5.

**Table 5. Historical Aerial Photographs from EDR
Eureka City School Albee Stadium Renovations Project; Eureka, California**

Year	Source	Scale	Description
1941	USDA ^a	1" =500'	The site is shown as developed with several school buildings south of Del Norte Street and Albee Field. There is a small baseball field immediately northeast of the track, but still on the same property as Albee Field. The area north, east, and south of Albee Field is shown as mostly forested area with what appear to be residential structures scattered within. Cooper Gulch to the north of Albee Field is mostly undeveloped except for a couple east-west trending roads, and possibly a couple of small buildings. The area west of Albee Field and Cooper Gulch is well developed and appears residential.
1954	USDA	1" =500'	New school buildings have been constructed north of Albee Field on the north side of Del Norte Street. The school buildings south of Del Norte Street and Albee Field appear relatively unchanged, except for some development directly adjacent to Albee Field on the west side where the modern-day stadium seating is located. Residential areas north of Albee Field shown expansion into the Cooper Gulch area.
1957	USGS ^b	1" = 500'	Additional vegetation clearing north of Albee Field on the north side of Del Norte Street, where the modern-day baseball field is located. Stadium bleachers appear to have been built on the west side of Albee Field.
1969	USGS	1" =500'	Renovations or add-ons have been constructed on the school buildings south of Del Norte Street. The area that was cleared of vegetation north of Del Norte Street has become a grass field. North of this new field, a large patch of vegetation was removed from the Cooper Gulch area. A large parking area is shown in the area immediately southeast of the gymnasium.
1972	USGS	1" = 500'	Similar to last photograph.
1974	USGS	1" = 500'	Infrared aerial imagery. Albee Field appears unchanged from previous photograph.
1983	USDA	1" = 500'	Infrared aerial imagery. The baseball field that was immediately northeast of the track at Albee field has not been maintained and the new baseball diamond has been constructed in the grass field on the north side of Del Norte Street (same location as modern-day baseball field). A new area that is assumed to be track tar-mat has been added on the north side of Albee Field within the track loop.
1990	USGS/DOQQ ^c	1" = 500'	Infrared aerial imagery. Very similar to last photograph, except that a large circular area immediately northeast of the track at Albee Field has been cleared of vegetation (previous location of the old baseball field).

Year	Source	Scale	Description
2005	USDA/NAIP ^d	1" = 500'	What appears to be a small service road has been paved in the grassy area on the northwest side of Albee Field. The circular area on the northeast side of the field that appeared clear of vegetation in the previous photograph has been constructed as a smaller baseball diamond. The area to the southwest of Albee Field that was shown as a cleared parking area in the 1969 photograph has been revegetated and is shown as a grassy field.
2009	USDA/NAIP	1" = 500'	Similar to previous photograph, except some additional construction on the east side of the two large, square, school buildings that are south of Del Norte Street.
2012	USDA/NAIP	1" = 500'	Similar to previous photograph.
2016	USDA/NAIP	1" = 500'	Similar to previous photograph, except the large trees on the north side of Albee Field that bordered Del Norte Street were removed.

6.3 Results of Regulatory Agency Contacts–Humboldt County Division of Environmental Health

SHN interviewed Norm Crawford of the HCDEH in December 2020 during the execution of this Phase I ESA regarding the site. He reviewed the historical air board, local oversight program (LOP), and CUPA files and did not locate information pertaining to the subject site.

6.4 Results of Personnel Interviews/Site Records Review

6.4.1 User/Owner Questionnaire

Charley Batini (Director of Maintenance and Facilities) completed a "Phase I ESA Questionnaire," as the report user, as part of the interview process. These questions were developed to address potential areas of concern from a hazardous materials perspective that may be present on the subject property and/or known RECs as defined in ASTM Standard E1527-13. A copy of the user questionnaire completed by Charley Batini is included in Appendix 4.

Batini was not aware of any environmental cleanup lien or government notification relating to past or recurrent violations with respect to the property. To the best of Batini's knowledge, there is no past or pending lawsuit concerning a release or threatened release of hazardous substance or petroleum products involving the property by any owner or occupant of the property.

6.4.2 Site Records Review

The results of the regulatory agency file reviews for the subject property and adjacent properties are discussed in Section 6.3, above.

6.5 Potential for Vapor Intrusion

Given the review of regulatory case for properties located in the vicinity of the site, and the site's historical use, the potential for volatile organic compounds in site soil and the potential for vapor intrusion at the site is low.

6.6 Synopsis of Results of Previous Environmental Investigations–EDR Database

Using the ASTM Standard Practice E1527-13 recommended search radii, SHN reviewed the EDR database, which tracks sites with known hazardous materials and hazardous material releases (Appendix 3).

EDR did not identify any potential or confirmed state or federal "Superfund" site located on or immediately adjacent to the subject property during its review of the EPA's CERCLIS and NPL databases. The subject property does not appear on the EPA's Emergency Response Notification System (ERNS) database or contain any business or facility that is listed as a Resource Conservation and Recovery Act (RCRA) large quantity generator.

SHN reviewed databases regarding hazardous materials contamination that are maintained by the following agencies:

- U.S. Environmental Protection Agency (EPA)
- Federal National Priority List (NPL) sites
- Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) sites
- Federal Resource Conservation and Recovery Act (RCRA) sites
- Federal Emergency Response Notification System (ERNS) sites
- State and tribal–equivalent CERCLIS; Confirmed Release List and Inventory (CRL); and Environmental Cleanup Site Information System (ECSI)
- State and tribal landfill and/or solid waste disposal site lists; Solid Waste Facilities database (SWF/LF)
- State and tribal leaking storage tank lists: Leaking Underground Storage Tank Database (LUST)
- State and tribal registered storage tanks lists; Underground Storage Tank database (UST)
- Federal listing of Federal Emergency Management Agency (FEMA)-owned USTs (FEMA UST)
- Many other lists, such as Brownfield sites, open dump inventories, illegal dump sites, historical and old closed solid waste disposal sites, clandestine drug labs, federal CERCLA and local lien information, local Land Use Control Information (LUCIS), Hazardous Materials Information Reporting Systems (HMIRS), and spill data regarding oil and hazardous materials reported to the Environmental Response Program

7.0 Discussion

This section summarizes the findings in this assessment and identifies RECs. A REC, as defined in ASTM Standard Practice E1527-13, means:

“...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.”

A controlled REC is defined as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (as evidenced by issuing a no further action letter), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. A controlled REC shall be listed as a REC. There is no controlled REC associated with this site based upon our review of the available information for the site and adjacent properties.

A historical REC is defined as a past release of any hazardous substance or petroleum product that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority without subjecting the property to any required controls, such as property use restrictions, activity and use limitations, institutional controls, and/or engineering controls. There is no historical REC associated with the subject site.

No potential or confirmed state or federal Superfund site is located on, or immediately adjacent to, the subject property.

A business environmental risk is defined as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by ASTM Standard E1527-13. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations. Three business environmental risks were identified for the site during the preparation of this Phase I ESA: the identification of fill materials beneath the site and the presence of ACM and LBP at the site.

SHN's research conducted for the subject property included interviews with people that are knowledgeable about the site and reviews of historical maps, aerial photographs, and agency records. This ESA revealed that the subject property was historically a residence and recreation center. Currently, the subject property is a recreation center that is not open to the community.

8.0 Conclusions

SHN has performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 for the subject site in Eureka, California. Exceptions to, or deletions from this practice are described in Section 10 of this report. The presence of fill materials, ACM, and LBP are business environmental risks for the site.

9.0 Recommendations

As part of our detailed investigation of the subject site, SHN encountered no evidence of past land uses that may have generated or caused the release of regulated or hazardous materials at the subject site. SHN conservatively recommends characterization of soil and groundwater quality prior to site construction if excavated fill materials will not be reused on the site as a best management practice to evaluate the need for worker protection and potential disposal options for excavated soil and groundwater.

10.0 Limitations

Information contained in this ESA was obtained in part from EDR (Appendix 3). SHN derived the data in this report primarily from visual inspections, examination of records in the public domain, and interviews with selected individuals with information about the property.

Except as otherwise stated in this report, SHN has not attempted to verify the accuracy or completeness of any such information. The passage of time, manifestation of latent conditions, or occurrence of future events may require further exploration at the property; analysis of the data; and re-evaluation of the findings, observations, and conclusions expressed in this report.

Because of the limitations stated above, the findings, observations, and conclusions expressed by SHN in this report are not, and should not be considered, an opinion concerning the compliance of any past or present owner or operator of the property with any federal, state, or local laws or regulations. No warranty or guarantee, whether express or implied, is made with respect to the data reported or findings, observations, and conclusions expressed in this report. Such data, findings, observations, and conclusions are based solely on site conditions in existence at the time of the investigation and are not representative of areas of the property that were not readily accessible or observable.

No ESA can wholly eliminate uncertainty regarding the potential for a REC in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property; this practice recognizes reasonable limits of time and cost.

The ASTM Standard E1527-13 guidance document states that one of the objectives of a Phase I ESA is to identify the subject property's usage back to when the property was first developed or back to 1940 (whichever is earlier).

No significant data gap has been identified during the preparation of this Phase I ESA; however, minor data gaps do exist and are as follows:

- A title report was not provided.
- Some of the aerial photos were taken more than 10 years apart and several were of poor quality.

These data gaps do not appear significant, because the site use appears to have been delineated from additional sources, such as historical topographic maps.

The preparation of this Phase I ESA did not deviate significantly from the guidelines presented in ASTM E1527-13. SHN was able to delineate a continuous site history dating back to 1933.

13.0 Statement of Qualifications of Environmental Professionals

SHN's project team included Anna Gower and Roland Rueber. Ms. Gower has worked for SHN for over three years and has been conducting Phase 1 ESAs for more than twenty years. Mr. Roland Rueber is a Registered Geologist in the State of California and has worked for SHN for more than 22 years; he provided the quality assurance and quality control for this site assessment.

We declare that, to the best of our professional knowledge and belief, we meet the definition of an Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312. We have the specific qualifications based on education, training, and experience to assess a property of this nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SHN Consulting Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/28/2020 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

CERS:

Name: EUREKA HIGH SCHOOL - AUTO SHOP & POOL MAINTENANCE
Address: 1915 J ST
City,State,Zip: EUREKA, CA 95501
Site ID: 28763
CERS ID: 10021078
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 28763
Site Name: Eureka High School - Auto Shop & Pool Maintenance
Violation Date: 2/24/2015
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 04/30/2015. While on site the waste manifests could not be located. I will need to see all waste manifests generated since 2/25/2013.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 28763
Site Name: Eureka High School - Auto Shop & Pool Maintenance
Violation Date: 2/24/2015
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 05/01/2015. There was an open five gallon bucket in the shop with waste oil in it.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 28763
Site Name: Eureka High School - Auto Shop & Pool Maintenance
Violation Date: 2/24/2015
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes: Returned to compliance on 05/01/2015. The auto staff must be trained with respect to spill containment, safety and emergency response and this training shall be refreshed on an annual basis with documentation.
Violation Division: Humboldt County Division of Environmental Health
Violation Program: HW

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-19-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Recommend reducing quantities of waste oil and anti-freeze and increasing quantities of Oxygen on CERS inventory Add quantities of Argon if the quantities reach reporting limit of 1,000 cubic feet

Eval Division: Humboldt County Division of Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-24-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: The hazardous materials business plan on the California Environmental Reporting System website is not sufficient or up to date. There are personnel listed on the emergency response plan that no longer work for you. Also the site map needs to be updated to include where the materials and wastes are located. I instructed Mr. Ed Sullivan during the inspection and would be happy to help Mr. Pires with direction. You will need to remove the Sodium Hypochlorite solution in the tank for the pool which is no longer used.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Latitude: 40.7919303821487
Longitude: -124.185751676559
Case Type: Cleanup Program Site
Case Worker: ZZZ
Local Agency: HUMBOLDT COUNTY LOP
RB Case Number: 1NHU103
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Sediments, Soil, Surface water
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: Former Plywood Mill site. Contamination with petroleum products, pentachlorophenol, and dioxins have been identified. Several interim remedial actions have taken place. More work is being completed.

Case Type: Cleanup Program Site
Case Worker: CSW
Local Agency: HUMBOLDT COUNTY LOP
RB Case Number: 1NHU715
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Aviation, Waste Oil / Motor / Hydraulic / Lubricating
Site History: The site was used as a softwood lumber sawmill. The buildings housed mill and sawing operations that included wood cutting areas, wood treatment areas, fuel and chemical storage, and equipment storage areas. A teepee burner used to incinerate waste wood was located on the western border of the property just north of the lumber mill building. Historic use at the site as a lumber mill included wood treatment and incineration, and storage of hazardous chemicals at the

Case Type: Cleanup Program Site
Case Worker: CSH
Local Agency: HUMBOLDT COUNTY LOP
RB Case Number: 1NHU282
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: The site is used as an operations and equipment repair facility for PG&E's gas measurement and control group, as an electrical substation, a gas regulation station, and site to store construction materials. Between 1907 and 1950 the site was used for fuel oil storage to supply a nearby manufactured gas plant, until the plant was placed on standby in 1947, and eventually disconnected from service. In 1949, a liquid petroleum gas plant was built on the property and operated until 1989. Large capacity aboveground storage tanks (108,000 gallons) existed at the site until their removal in 1954. Environmental investigations have been ongoing at the site since 1988.

S110654201

portion of J Street, and residences. This closure review and recommendation regard only the UST case and not the SCP case related to the discharge of HVOCs. Two USTs were reportedly removed from the service station in August 1971 during the construction of an office building. The office building was later demolished and the existing jail facility was built in its place in 1994. During the construction of the jail, approximately 60 cubic yards of petroleum hydrocarbon contaminated soil was excavated from the area of the former USTs. The analytical results from the excavation confirmation soil samples were non detect for gasoline and BTEX constituents. In February 1994 approximately 270 cubic yards of soil impacted with halogenated volatile organic compounds (HVOCs) was excavated from the former dry cleaner property, east of the former service station. The analytical results indicated residual HVOC impacts remained in soil at the site. Between 1993 and 2008 several soil borings and groundwater monitoring wells were installed at the site and downgradient (north) towards Humboldt Bay. Groundwater monitoring has been performed infrequently. The HVOC case is open and can be accessed by clicking the "related cases" button on the Geotracker page.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 12/02/2020
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/28/2020

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895

Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/06/2020	Source: Department of the Navy
Date Data Arrived at EDR: 08/21/2020	Telephone: 843-820-7326
Date Made Active in Reports: 11/11/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 82	Next Scheduled EDR Contact: 02/22/2021
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 13	Next Scheduled EDR Contact: 03/08/2021
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019
Date Data Arrived at EDR: 04/15/2020

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

UTM Y (Meters):	4515888.0
Elevation:	76 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5629086 EUREKA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
0600620005C	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
0600600775C	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
EUREKA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	HOOKTON
Soil Surface Texture:	silty clay loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	19 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 0.60 Min: 0.20	Max: 6.00 Min: 5.60
2	19 inches	42 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 0.60 Min: 0.20	Max: 6.00 Min: 5.10
3	42 inches	60 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 0.20 Min: 0.06	Max: 5.50 Min: 4.50

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
fine sandy loam
silt loam
very gravelly - sand

Surficial Soil Types: loam
fine sandy loam
silt loam
very gravelly - sand

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: silt loam
sand and gravel
fine sandy loam
loamy fine sand
stratified
sandy clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Phase I ESA User Questionnaire

This User Questionnaire was prepared in general accordance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

Section I. Landowner Liability Protection Required Information

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments") the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Question	Determination		
1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?	Yes	No X	Unk
<i>Comments:</i>			
2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?	Yes	No X	Unk
<i>Comments:</i>			
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Yes	No X	Unk
<i>Comments:</i>			

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.20). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes	No	Unk N/A
<i>Comments:</i>			
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,	Yes	No	Unk
a. Do you know the past uses of the property?		X	
b. Do you know of specific chemicals that are present or once were present at the property?		X	
c. Do you know of spills or other chemical releases that have taken place at the property?		X	
d. Do you know of any environmental cleanups that have taken place at the property?		X	
<i>Comments:</i> a.)Area was a gulch that was filled to construct an athletic facility			
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.13). As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Yes	No X	Unk
<i>Comments:</i>			

Completed by: _____ Date: _____

Section II. Useful Information for Conducting the Phase I ESA

Please answer the following questions and provide the requested information. (This information is intended to assist the environmental professional but is not necessarily required to qualify for one of the LLPs.) The information includes:

1. Why is this Phase I ESA required? To repair storm drain line that runs under football, softball and baseball fields. Additional scope of work will include modernizing facilities to ADA codes
2. What type of property and property transaction is involved (for example, sale, purchase, exchange, etc.,)? Eureka City Schools owns property
3. Provide the complete and correct address for the property. (Attaching a map or other documentation showing property location and boundaries is helpful, if available.)
Eureka High School
1915 J Street
Eureka CA 95501
4. Provide the scope of services desired for the Phase I (including whether any parties to the property transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered).
N/A
5. Please identify and provide contact information for all parties who will rely on the Phase I Report. Fred Van Vleck 707 441-2414 Paul Ziegler 707 441-2412
Eureka City Schools
2100 J Street
Eureka CA 95501
6. Identify the site contact and provide contact information (name and phone number).
Charley Batini 707 441-2503

7. Are there any special terms and conditions that must be agreed upon by the environmental professional? ☐ Yes ☒ No If so, what are they?
8. Please provide any other knowledge or experience with the property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental condition). N/A

Site Assessment Questionnaire

Question	Owner			Occupant (if applicable)			Observed During Site Visit		
1. Is the property or any adjoining property used for an industrial use?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
2. To the best of your knowledge, has the property or any adjoining property been occupied by an industrial use in the past?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
3. Is the property or any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment storage, disposal, processing, or recycling facility?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
4. To the best of your knowledge has the property or any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
5. Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
6. Are there currently, or the best of your knowledge have there been previously, any industrial drums (typically 55 gal, 208 L) or sacks of chemicals located on the property or at the facility?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
7. Has fill dirt been brought on the property that originated from a contaminated site or that is of an unknown origin?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
8. Are there currently, or to the best of your knowledge have there been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
9. Is there currently, or to the best of your knowledge has there been previously, any stained soil on the property?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
10. Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located on the property?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									

Question	Owner			Occupant (if applicable)			Observed During Site Visit		
11. Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
12. Are there currently, or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
13. If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
14. Does the owner or of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
15. Has the owner or occupant or the property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property or any facility located on the property?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
16. Does the owner or occupant of the property have any knowledge of any environmental site assessment for the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property, or recommend further assessment of the property?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
17. Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
18. Does the property discharge wastewater on or adjacent to the property other than storm water into a sanitary sewer system?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
19. To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above ground, buried and/or burned on the property?	Yes	No X	Unk	Yes	No	Unk	Yes	No	Unk
Comments:									
Question	Owner			Occupant (if applicable)			Observed During Site		

							Visit		
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes X	No	Unk	Yes	No	Unk	Yes	No	Unk
				Comments: Three of six stadium light pole transformers were replaced and test results showed low levels PCB's in the transformer oils. Replacement of the three transformers were completed more than 12 years ago and we are unable to locate testing results from that time. Three original transformers are still located on the stadium light poles.
