ABOUT ANTILLES SCHOOL

Along with providing a rigorous curriculum that prepares students for acceptance to the nation's top universities, we also help shape their physical, emotional, and intellectual well-being. All courses are focused on core college preparatory material and skills but also allow students to engage at an age-appropriate pace, and in a greater depth. Small class sizes provide an individual student-teacher connection, while also enhancing student interaction. We challenge our learners to collaborate, to lead, to share decision making, and to be mindful of the environment around them.

Our school is situated on 27 acres on St. Thomas' south side, and our modern facilities include a theater, libraries, gymnasium, and laboratories which offer our students the time for deeper learning and provide a competitive edge upon acceptance to four-year colleges and universities. With close proximity to beaches, nature preserves, and historical landmarks, students are able to take advantage of off-campus learning opportunities under the water, in lush tropical forests, up mountain peaks, and across rich agricultural farm grounds.
