

## **Medical Transportation / Driver**

Burlingame, Newark or San Jose

Full-Time & Part-Time

The moment our Dispatch team successfully books a transport assuring the passenger/ caretaker the best service on this planet, you are the first to arrive on scene. This is when you take over. You'll get to know them, assess the situation, you'll understand their specific preferences, and you'll make sure as we bring them to their destination, that we've done our best to serve them, exceeding their expectations.

The job is a very fulfilling experience, handling lots of these types of tasks every day:

Transferring a patient from hospital bed to gurney or wheelchair

Operating a wheelchair and gurney equipped vehicle

Working with a partner for gurney and stair chair calls

Communicating with our dispatch team, hospital nurses, the passenger, and family members

Logging daily vehicle inspections

Basic patient assessments when arriving on scene

Driving to hospitals, residences, nursing homes, restaurants, shopping centers, airports, and even stadiums

Helping bring our passengers from bedside to doctor side

Don't worry, medical experience is not necessary. We have a complete (PAID) training program.
