COURSE DESCRIPTION:

This course will provide students the opportunity to develop their craft while producing school plays. This class will cover all areas of technical theatre production including scenery, lighting, costume, sound, rigging, props, stage management, and backstage etiquette. Students will gain knowledge by working daily in the scene shop to produce school plays and improve the school's theatre department. As a CTE course, this class will provide CTE certification to students who complete all levels of the class. This certification will show future employers and colleges that this student received all training required to work safely and effectively in a professional-style scene or costume shop. Therefore, all students will be required to take the state CTE Assessment in Technical Theatre in the spring.

NOTE: Course may be repeated for credit.
