

Policy EHBD
Original Adopted Date: Pending

ARTIFICIAL INTELLIGENCE USE

This policy and other district policies and procedures addressing artificial intelligence (AI) apply to student and employee AI use of district technology resources (as defined in policy EHB and including district-provided login credentials) regardless of whether the use occurs on district property, at district activities, or off campus when a nexus can be drawn to the educational environment.

This policy and other district AI policies and procedures also apply to free AI resources.

Students and employees may be disciplined for AI use that violates this policy or any related policy or procedure.

Definitions

The following definitions will apply to all district policies and procedures that relate to artificial intelligence:

Artificial Intelligence (AI) – Any hardware or software capable of adapting its output or performance by applying probabilistic algorithms to input. For the purposes of this policy, any product or service that contains or uses AI, is marketed as AI, or is marketed as using or containing any kind of AI will also be defined as AI when the AI component is used.

Confidential Data/Information – Information that the district is prohibited by law, policy, or contract from disclosing or that the district may disclose only in limited circumstances. Confidential data includes, but is not limited to, personally identifiable information (PII) about students and employees, student and employee medical information, student education records, and information about any student's individualized education program (IEP) or Section 504 plan.

Critical Data/Information – Information that is essential to district operations and that must be securely maintained to avoid disruption to district operations.

Generative AI – A type of AI whose primary purpose is to accept input, process the input through probabilistic algorithms, and use the result to generate new output that resembles human-made intellectual or creative work, such as writing or art. Large language models (chatbots) are an example of generative AI.

AI Coordinator and AI Use Plan

The superintendent designates the director of technology as the AI coordinator who will have chief responsibility for regulating, monitoring, and adjusting AI use in the district and developing

the district's AI Use Plan. The AI coordinator may share critical or confidential data only under appropriate confidentiality or nondisclosure agreements.

The AI Use Plan will provide a detailed set of rules for acceptable AI use in the district that may be regularly updated as new issues emerge. The purpose of the AI Use Plan is to protect the safety and security of students, employees, and the district while allowing for appropriate educational and productive enhancements enabled by AI. AI may be used by employees and students only in accordance with the AI Use Plan. Any AI product used must comply with legal privacy requirements.

Annual Review of AI Use

The AI coordinator will review the district's AI use for safety, data privacy, appropriateness, and effectiveness and make appropriate changes.

Notice to Parents/Guardians

The district will update parents/guardians at least annually with a summary of AI use in the district, including any significant changes to the AI Use Plan.
