

Dear Parents,

As Thanksgiving approaches, we're excited to offer an engaging way for students to stay active in their learning and have a bit of fun over the upcoming break! The Biology Department is launching the Thanksgiving Biology Quizizz Challenge designed to spark curiosity and keep young minds engaged in a friendly, educational activity.

The challenge consists of a series of 6 Biology Quizizz that include all the units we have covered thus far. This is a fantastic way for students to review and apply what they have learned in a relaxed setting.

Here's how it works:

1. Log in anytime: Students can access the Quizizz online anytime during the Thanksgiving break. They can use the QR Codes or access codes from the PDF sent home, on Canvas, or on the school website.
2. Progress at their own pace: The challenge is designed to be flexible, so students can go at their own pace. The challenge will start on Saturday 11/23 and will end on Saturday 12/07.
3. Celebrate Success: We'll recognize participants who complete the challenge when they return from break, celebrating their commitment to learning. Those who score 75% and higher will receive a Pizza Party. Additionally, 50 students who score the highest will get an extra special gift as well.

We encourage you to support your child in participating in this fun and educational activity. Not only is it a great way to keep their skills sharp, but it also gives them a sense of achievement during the break.

If you have any questions, please feel free to reach out. Wishing you and your family a wonderful Thanksgiving Break.

#BPND,

Mainland Biology Team
