RAMS Title I Targeted Assistance Plan 2024-2025

1.3 Targeted Assistance Programs

Targeted Assistance Programs identify students who are failing or at risk of failing to meet the state standards and provide Title I services (for example, an inclusion-push-in, pull-out or combination service delivery model). Title I funds can only be used for supplemental services to Title I students, their families and Title I staff.

1.3.1 What are the student selection criteria used for identifying Title I students?

(Multiple objective measures are required for entrance and exit from the

program.) Selection Criteria

Reading

- MCA 7th Grade – Score less than 650 on Reading 2023-2024 MCA test
- MCA 8th Grade –Score less than 750 on Reading 2023-2024 MCA test
- Previous MCA Scores below proficient if previous year's MCA is unavailable
- FAST aReading - Score below the 50th percentile
- Teacher recommendations based on observations, grades, and tests

Math

- MCA 7th Grade – Score less than 650 on Reading 2023-2024 MCA test
- MCA 8th Grade –Score less than 750 on Reading 2023-2024 MCA test
- Previous MCA Scores below proficient if previous year's MCA is unavailable
- FAST aMath - Score below the 50th percentile
- Teacher recommendations based on observations, grades, and tests

The following groups of students are automatically eligible to receive Title I services

- Any child attending a community day care program or living in a state or local institution for neglected or delinquent children.
- Any child served in the previous two years under the Migrant Education Program.
- Any child who is homeless.

In the case that there are not enough resources to serve all eligible students, FAHS will create a prioritized list of eligible students with those children failing or most at risk of failing getting the first opportunity to receive Title I services. It is also important to note that selection for services is based upon low achievement, **NOT low income**. A student from an affluent family who is in a Title I school and is having academic difficulty is eligible for services on the same basis as any other student.

Exit Criteria

- a. Proficiency on the MCA test.
- b. Student performing above the 80th percentile on the aReading and/or aMath assessment and has shown consistent evidence of application of reading and/or math skills as measured by Grades.
- c. Student risk factors have decreased to a level no longer interfering with learning progress
- d. The current intervention strategies have not been effective and other interventions are needed, or outside interventions supersedes school intervention
- c. The current intervention strategies have not been effective and other interventions are needed.

1.3.2 List the reading services to students, including the service model to be used.

(Example: inclusion – push in, pull-out, or combination.)

Pull out - The Literacy Academy or Learning Academy class is an additional class that students will take for 1, 2, or 3 trimesters each school year.

1.3.3 List the mathematics services to students, including the service model to be used. (Example: inclusion – push in, pull-out, or combination.)

Pull out – Math Academy or Learning Academy class is an additional class that students will take for 1, 2, or 3 trimesters each school year.

1.3.4 Describe the program evaluation process including how multiple sources of data will be used for making programmatic decisions that impact student academic achievement.

Data will drive the evaluation process. Data will include progress monitoring assessments as well as summative data: MobyMax, quizzes and tests and MCA. Baseline data will be collected at the beginning of the school year. During the school year, staff will monitor student progress on a weekly or biweekly basis. This would allow staff to determine if the interventions are working, if they need to be tweaked or changed, or if other interventions may be needed.

Staff will use progress monitoring data and summative assessment data to monitor students' progress as well as evaluate the program on an ongoing basis. FAST testing will happen at least once per trimester. Results from FAST testing will be shared with families at the end of each trimester. The Academy team will analyze and review data monthly. Data could include progress monitoring assessments, formative assessments, exit slips, student interviews, administrative classroom visits as well as summative data.

1.3.5 Describe how the Title I Targeted Assistance Program was developed in consultation with teachers, administrators, families, and other appropriate school personnel.

Staff reviewed and analyzed student assessment data (MCA, grades, FAST data) and student performance on assessments and in class work, as well as attendance and engagement data. Staff determined that there needed to be Tier 2 interventions in place for students not proficient in Math and Reading as well as supports for students with risk factors that are interfering with learning progress. Staff discussed the need at the annual meeting and from there Learning Academy, Math Academy and Academy Support were created.
