

OUR CAREER & TECHNICAL PROGRAMS

The atmosphere in our Career and Technical Programs is one where students are learning from experienced and qualified instructors to acquire technical and academic skills for high-demand careers. Students at Keefe Tech gain a powerful competitive advantage by merging their robust academic education with their career and technical experience.

In their Career and Technical Programs, students set themselves apart by earning critical business and industry certifications, required licenses and college credits. Our graduates are prepared with the academic and technical skills necessary to enter into their respective careers paths as skilled technicians, or pursue additional education at a variety of colleges and universities.

Keefe Tech

CAREER & TECH PROGRAM GUIDE

WELCOME

Established in 1967, Keefe Regional Technical School is a coeducational, four-year high school, accredited by the New England Association of Schools and Colleges. Keefe Tech primarily serves students from the in-district communities of Ashland, Framingham, Holliston, Hopkinton, and Natick. With a student body of approximately 900 students, Keefe Tech offers both academic and career-focused programs.

Keefe's academic component provides students with a dynamic and comprehensive program to best guarantee success after high school. We offer a full College Preparatory and Honors Program, with opportunities for students to participate in Advanced Placement courses and Dual Enrollment courses at local colleges and universities. Our Career and Technical Program begins in grade 9 with Career Exploratory. Students select their area of study in one of our 16 Career and Technical Programs after 8 exploratory cycles in their grade 9 year and begin an alternating week schedule between Academics and Career/Technical Program at the start of their grade 10 year.

"Our mission is to challenge students to demonstrate the academic, technical, and interpersonal skills necessary for successful lifelong learning."

Keefe Tech provides an exceptional high school experience that prepares students to enter their respective career paths as skilled employees, or further their study at a variety of two and four-year colleges and universities. We encourage our students to make the most of their high school experience by discovering what they are passionate about.

Keefe Regional Technical School is committed to ensuring that all of its programs and facilities are accessible to all members of the public. We do not discriminate on the basis of age, color, disability, limited English proficiency, gender identity, housing status, national origin, religion, sex, or sexual orientation.

AUTOMOTIVE TECHNOLOGY

- Work on cars and trucks in a rapidly changing industry alongside Master Technicians
- Use computerized diagnostic equipment to troubleshoot and repair complex automotive systems
- Optimize operation and performance of domestic and foreign vehicles

CAREER FOCUS

Prepared for ASE Certification, immediate employment and further education
