### SCUBA DIVING PADI OPEN WATER DIVER (AGES 10+)

During the PADI Open Water Diver course, you'll learn what you need to know to explore the underwater world using scuba.

The PADI Open Water Diver course includes three parts: Knowledge Development, Confined Water Dives, and Open Water Dives. Knowledge Development covers the principles, concepts and terms you need to know for dive safety and enjoyment. During the Confined Water Dives, you learn and practice scuba skills under controlled lake conditions. You'll enjoy making one or more mini-dives, which take you through the same steps you follow when you make open water dives. To complete training you practice, apply and demonstrate what you learn during your Open Water Dives at a local dive site.

Earning a PADI Open Water Diver certification shows that you've met the course requirements. Dive centers and resorts require proof of certification before they will rent scuba equipment, fill scuba cylinders or book dive excursions. As a PADI Open Water Diver, you'll be trained to a maximum depth of 18 meters/60 feet, and are qualified to dive in conditions as good as, or better than, those in which you trained. It's just the beginning of a lifetime filled with dive adventures.

- 1st class will be held at the Shelby Township Activities Center (14275 Rick Dr., Shelby Twp.). Dives will be conducted at Stony Lake Township Park (1397 Lapeer Rd., Oxford). Fee includes all rental equipment and air fills for each class related dive.

## ADULT RECREATION & ENRICHMENT

### SCUBA DIVING ENRICHED AIR/NITROX DIVER (AGES 12+)

Enriched Air, also known as “NITROX”, is a form of breathing gas that allows divers to extend bottom time and reduce nitrogen loading. It is PADI’s most popular specialty course. This certification counts toward the PADI Master Scuba Diver rating. You’ll learn why diving with air that has higher oxygen and lower nitrogen content gives you more bottom time, along with enriched air equipment considerations. During our virtual classroom session you will: Discuss managing oxygen exposure; Discuss analyzing oxygen content in your scuba tank; Set your dive computer for diving with enriched air/nitrox.

Classes are done via ZOOM. Upon student registration, each participant will receive e-Learning material for review. Classroom and exam will be conducted via Zoom. The ZOOM link will be emailed by the instructor. • Instructor: Mario Lepore • 1 Session(s) — \$199

*Open House events occur 12-3 pm on every 2nd Saturday & 4th Sunday of the month!\**

**Saturday, January 11 & Sunday, January 26 12-3 pm– Hibernation & Caves**

Inside the nature center we'll learn about caves and the animals that live in them, particularly during winter. On **January 11th** we'll make our own paper plate caves decorated with cave formations and go outside to breathe and move like a bear getting ready to hibernate! **January 26th** we'll have a scavenger hunt outside for our hibernating puppets and make a 'lift the flap' hibernating animal craft.

**Saturday, February 8 & Sunday, February 23 12-3 pm– Dinosaurs**

**February 8th** we'll look at a timeline to see which dinosaurs lived when, put together paper T. rex models to take home, and outside we'll play a dinosaur dance game. On **February 23rd**, we'll measure the lengths of common dinosaurs outside. Inside, we'll examine dinosaur fossil replicas and build pasta dinosaur dioramas to take home.

**Saturday, March 8 & Sunday, March 23 12-3 pm– Trees & Forest**

**March 8** join us inside to learn about the lifecycle of a tree and match tree buds, bark, and leaves to the correct tree. Make your own tree ID booklet. We'll go outside and take bark rubbings of different kinds of trees we find. On **March 23**, we'll learn about the lifecycle of a forest– a process called succession. Make a forest collage with different types of trees. Then go outside to experience the differences of tree communities.

**Saturday, April 12 & Sunday, April 27 12-3 pm– Amazing Amphibians!**

Discover the frogs and salamander species found in Michigan, learn about their lifecycles, and hear the frogs' calls inside the nature center. On **April 12** we'll make toad abodes, meet a toad, and outside we'll look for tadpoles in the wetland around the lake. On **April 27** we decorate a paper towel tube "log" with salamander cutouts and outside we'll go for a walk looking under logs for salamanders.

**Saturday, May 10 & Sunday, May 18 12-3 pm– Creature Colors: Camouflage & Warning Colors**

**May 10** we'll look at how animals with sometimes surprising patterns can disappear in their habitat. Color a camouflaged animal within their habitat, then go outside for a camo critter scavenger hunt. **May 18** is all about warning– usually bright colors are used, or sometimes a simple black and white stripe gets the message across. We'll play a game of warning flag tag outside and paint a flying Monarch butterfly toy to take home.
