

# Adding End of Term Comments into JumpRope Elementary

November 2023

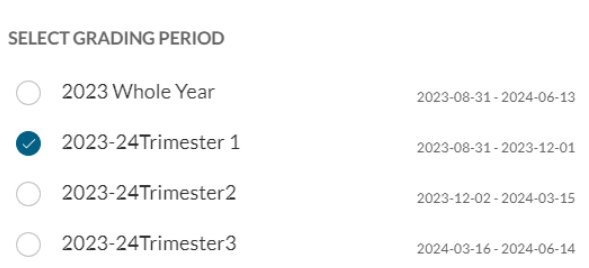

Open a gradebook by clicking on the Grade button

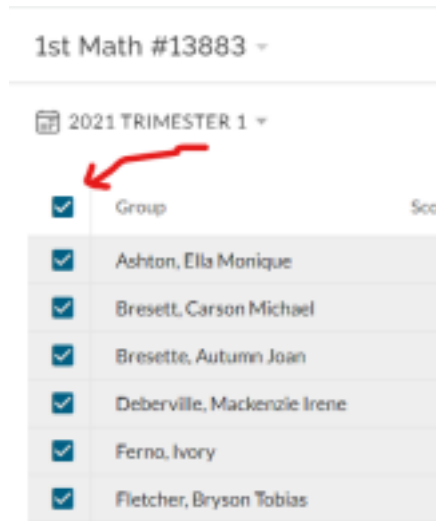

Make sure there are scores in the Gradebook for all students that you want to comment on. Click the Class Comment button

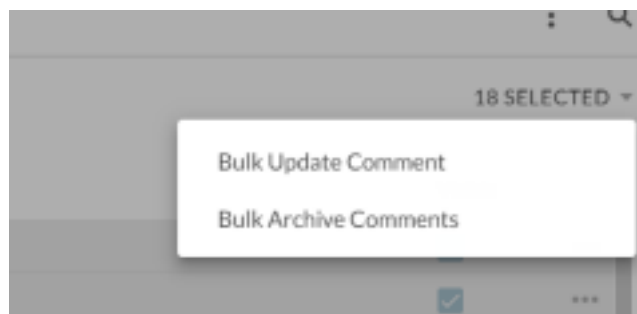

Change the view to **Trimester 1**

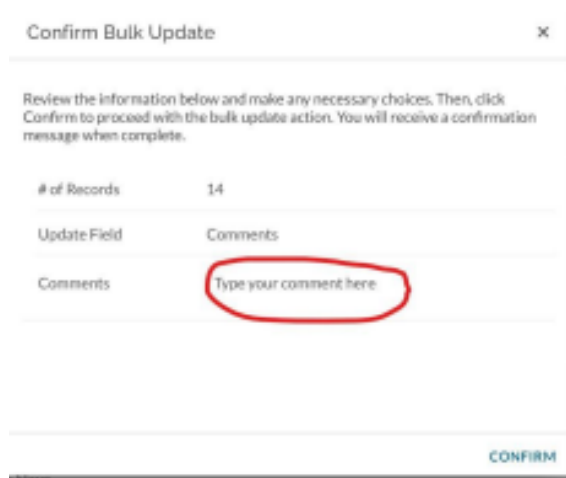

Select the whole group. My suggestion is to create a “bulk” comment, apply it to all students and then go and individualize.

Then go to the upper right side and look for the menu that says #Selected and click the little arrow to see Bulk Update Comment.

Type your comment on the line for Comments. It will apply that comment to all selected students.

To personalize your comment after doing the bulk import, please select each student (3 dots on the far right) and continue your comments. JumpRope DOES NOT support

multiple paragraphs, so you have to add your comment to the one already there. Do you BULK comments first.
