1.0 EXECUTIVE SUMMARY

As authorized by acceptance of our Proposal No. P24-1569 by School District Five of Lexington and Richland Counties representatives, Bunnell-Lammons Engineering, Inc. (BLE) performed a Phase I Environmental Site Assessment (ESA) of the property identified as Richland County Parcel Numbers R05200-01-13 and R05200-01-18 located at 1627 and 1635 Hollingshed Road in Irmo, Richland County, South Carolina (herein referred to as the “Site”). The purpose of the Phase I ESA was to identify Recognized Environmental Conditions (RECs) in general accordance with the American Society for Testing and Materials (ASTM) E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The Site location is indicated on the attached Figures 1 and 2 (**Appendix A**).

Findings & Opinions

BLE performed the Phase I ESA Site reconnaissance on October 15, 2024. During the Phase I ESA, BLE was provided access to the Site by Mr. Allen Knotts, the Director of Facilities Operations for School District Five of Lexington & Richland Counties; however, BLE performed the Site reconnaissance unescorted. The following is a summary of BLE’s findings and opinions of this assessment:

- The Site consists of two (2) parcels of land identified by the Richland County Tax Assessor as Parcel Number R05200-01-18 and R05200-01-13, totaling approximately 25.34 acres. The Site is located approximately 3.6 miles northeast of downtown Irmo, South Carolina. The Site is generally bound by Hollingshed Road to the south and Kennerly Road to the west.
- At the time of the October 15, 2024 Site reconnaissance, the Site consisted primarily of wooded land with one (1) dilapidated house located on the southern portion of the Site. An intermittent stream traversed the northeastern portion of the Site in a general northwest to southeast direction. Unpaved roads traverses the northeastern portion of the Site in a general northwest to southeast and north to south direction, and on the southern portion of the Site in a general north to south direction. A power line easement traverses the southwestern portion of the Site in a general east to west direction.
- No underground storage tanks (USTs) or aboveground storage tanks (ASTs) were observed or otherwise identified associated with the Site.
- One (1) empty 55-gallon drum was observed on the central eastern portion of the Site. BLE did not observe staining or evidence of a release associated with the drum.
- Historical records indicate the Site was developed for residential purposes from at least circa 1938 through circa 2006. The southeastern portion of the Site appeared as agricultural land from circa 1938 through circa 1951. The northeastern portion of the Site is cleared circa 1951 and becomes wooded circa 1994. The Site has been vacant wooded land since circa 2006.
- Surrounding properties generally consist of residential development and wooded land. Residential development and wooded land are located to the north, east, and west of the Site. Residential development is located to the south of the Site beyond Hollingshed Road.
- The surrounding area consisted primarily of agricultural land and wooded land from at least the late 1940s through the early 1970s. Residential development appeared to the south and west of the

Site in the mid-1980s. Additional residential development appeared to the north and east of the Site in the mid-2000s. Commercial development appeared to the west of the Site in the mid-2000s. Development in the surrounding area has appeared similar to present-day conditions since circa 2006.

- Neither the Site nor immediately adjacent properties were identified in environmental regulatory databases. Surrounding properties (Section 6.1 and **Appendix D**) were identified through review of the environmental databases. However, it is BLE's opinion these properties do not represent a REC, due to their topographic gradient, hydrogeologic separation from the Site, and/or the information provided in available regulatory database records.

Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-21 of Richland County Parcel Numbers R05200-01-18 and R05200-01-13 located at 1627 and 1635 Hollingshed Road in Irmo, Richland County, South Carolina, the Site. Any exceptions to, or deletions from, this practice are described in Section 2.2 and/or Section 6.6 of this report. This assessment has revealed no REC in connection with the Site.

The following business environmental risks (BERs) were identified during this assessment:

- Suspect asbestos containing materials (ACMs) were visually observed by BLE during the course of this assessment. This Phase I ESA did not include the collection of suspect ACM samples and is not considered an asbestos survey.
- According to the US Fish and Wildlife Service (USFWS) National Wetlands Inventory (NWI) mapper, a portion of an approximate 2.49-acre freshwater forested/shrub wetland and a portion of an approximate 0.29-acre riverine habitat are located on the northeastern portion of the Site.

No controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs), de minimis conditions, or significant data gaps were identified during this assessment.

2.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I ESA of the Site, which is identified as Richland County Parcel Numbers R05200-01-18 and R05200-01-13 located at 1627 and 1635 Hollingshed Road in Irmo, Richland County, South Carolina. BLE was retained by School District Five of Lexington and Richland Counties to prepare this report, which was performed in general accordance with ASTM E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The methods and terms used in this report are defined in the referenced proposal.

2.1 Purpose/Scope of Services

Good commercial and customary practice for conducting environmental site assessments has the goal of conducting all appropriate inquiries by providing an independent, professional opinion regarding recognized environmental conditions (RECs), as defined by ASTM, associated with the Site. The term REC means (1) the presence of hazardous substances or petroleum products in, on, or at the Site due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Site due to a likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Site under conditions that pose a material threat of a future release to the environment.

A *de minimis* condition is defined as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate regulatory agencies. A condition determined to be *de minimis* is not a recognized environmental condition nor a controlled recognized environmental condition.

A historical recognized environmental condition (HREC) is defined as a previous release of hazardous substances or petroleum products affecting the Site that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Site to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

A controlled recognized environmental condition (CREC) is defined as a recognized environmental condition affecting the Site that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

Generally, the assessment included the following components:

- A review of readily-available information on general geology and topography of the Site, local groundwater conditions, sources of water, power, and sewer, and proximity to ecologically sensitive receptors, such as streams, that might be impacted by RECs and environmental issues.
- An investigation of the historical use of the Site through reasonably ascertainable ASTM Standard Historical Sources for evidence of prior land use that could have led to RECs. These Standard Historical Sources may include: aerial photography, fire insurance maps, property tax files, United States Geological Survey (USGS) topographic maps, local street directories, building department records, and/or zoning/land use records.

- A review of environmental records available from the client, Site owner, or Site contact including regulatory agency reports, permits, registrations, and consultant reports for evidence of RECs and Activity and Land Use Limitations (AULs).
- A review of a commercial database summary of ASTM Standard Federal, State, and Tribal regulatory agency records pertinent to the Site and off-site facilities located within ASTM-specified search distances from the Site.
- Interviews regarding current and previous uses of the Site, particularly activities involving hazardous substances and petroleum products.
- A reconnaissance of the Site for visual evidence of RECs, including, but not limited to: existing or potential sources of soil, water, or vapor contamination, as evidenced by soil or pavement staining or discoloration; stressed vegetation; indications of waste dumping or burial (pits, ponds, or lagoons); containers of hazardous substances or petroleum products; electrical and hydraulic equipment that may contain polychlorinated biphenyls (PCBs), such as electrical transformers and hydraulic hoists; underground and aboveground storage tanks (USTs and ASTs, respectively); etc.
- A visual assessment (from the line of the Site and/or public right-of-ways) of adjacent properties for evidence of potential off-Site environmental conditions that may affect the Site.
- An evaluation for the migration of hazardous substances or petroleum products in any form onto the Site, including the migration of solid, liquid, and/or vapor.
- An evaluation of the information gathered during the assessment by an Environmental Professional (as defined in §312.10 of 40 CFR 312) to reach conclusions concerning RECs, and development of this report.

This assessment did not include sampling or analysis of soil, groundwater, surface water, soil gas, or other media; however, in accordance with ASTM E 1527-21, this assessment did include evaluation of existing or potential sources of contamination from these various environmental media that may have resulted in the identification of a REC in, on or at the Site.

2.2 Assumptions, Limitations, and Exceptions

Information for the assessment was obtained from sources referenced in the report. This information, to the extent it was relied on to form our opinion, is assumed to be correct and complete. BLE is not responsible for the quality or content of information from these sources.

BLE has prepared this Phase I ESA using reasonable efforts in each phase of its work to identify RECs associated with hazardous substances or petroleum products at the Site. The scope-of-work for this Phase I ESA was consistent with the ASTM E 1527-21. Findings within this report are based on information collected from observations made on the day of the Site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and referenced sources.

BLE's observations of the Site were generally from public right-of-ways, accessible Site pathways, areas within the Site boundaries, and/or interior and exterior areas of Site structures, if present and accessible. BLE determined the approximate Site boundaries from interpretation of aerial photographs, tax map records

obtained by referencing the Site address, on-Site survey markers (if present), and/or documents provided by the User.

This report is not definitive and should not be assumed to be a complete or specific definition of all conditions above or below grade. Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes. BLE makes no representation or warranty that past or current operations at the Site are or have been in compliance with all applicable federal, state, and local laws, regulations, and codes. BLE's attempt to observe the Site for the presence or absence of hazardous substances or petroleum products, generation, treatment, storage, or disposal of such materials, and equipment that utilizes oils which potentially contain PCBs should not be considered exhaustive.

Regardless of the findings stated in this report, BLE is not responsible for consequences or conditions arising from illegal or improper site activities after our Site visit, facts that were concealed, withheld, or not fully disclosed at the time the assessment was conducted. This report does not warrant against past, present, or future operations or conditions, nor does it warrant against operations or conditions present of any type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report focuses on the Site and neighboring properties that could impact the Site. Neighboring properties listed in governmental environmental records are identified within specific search distances. The search distance varies depending upon the particular government record being checked. The regulatory research is designed to meet the requirements of ASTM E 1527-21. The information provided in the regulatory database report is assumed to be correct and complete unless obviously contradicted by field observation or other reviewed sources.

Reasonable efforts have been made during this assessment to identify the presence or likely presence of any hazardous substances or petroleum products in, on, or at the Site. "Reasonable efforts" are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to paving, construction debris pile storage, vegetation, or incorrect information from available sources. Furthermore, *reasonably ascertainable* information includes information that is 1) publicly available, 2) obtainable from its source within reasonable time and cost constraints, and 3) practically reviewable.

BLE is not a professional title insurance firm and makes no guarantee, explicit or implied, that any land title records reviewed represent a comprehensive or precise delineation of past Site ownership or occupancy for legal purposes.

2.3 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by the User of this report (School District Five of Lexington and Richland Counties), pursuant to previously agreed upon terms and conditions. Reliance on this document by any party other than School District Five of Lexington and Richland Counties may occur only upon the express written consent of School District Five of Lexington and Richland Counties, and upon the relying third party's execution of a written Secondary Client Agreement between the relying third party and BLE. The services provided have been performed for School District Five of Lexington and Richland Counties and this report may or may not be suitable for any and/or all of the

purposes of the relying third party. Use of this report for purposes beyond those reasonably intended by School District Five of Lexington and Richland Counties and BLE will be at the sole risk of the User. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations placed on the scope, nature and type of BLE's services as stated in BLE's proposal and/or this report, and with the acknowledgment that actual Site conditions may change with time, and hidden conditions may exist at the Site that were not discoverable within the authorized scope of the assessment. BLE makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied.

2.4 Report Validity

According to ASTM E 1527-21, certain components of the Phase I ESA will expire 180 days from the date of the component and subsequently may require updating in order to satisfy All Appropriate Inquiry. The issuance date of this report may not represent the date the individual components of All Appropriate Inquiries were completed and should not be used when evaluating compliance with the 180-days or 1-year All Appropriate Inquiries requirements. If 180 days have passed since the completion of a component of the Phase I ESA, the report should be updated to remain compliant with the All Appropriate Inquires requirement. The entire report will expire one year from the earliest date of a given component.

The following table lists the dates of completion for pertinent components:

Component	Date of Initiation
Environmental Database Search	October 15, 2024
Site Reconnaissance	October 15, 2024
Interviews	October 11, 2024
Declaration by Environmental Professional	October 21, 2024

2.4.1 Client's Obligations Under ASTM 1527-21

It should be understood by Client (as the "User") that BLE's search of institutional and engineering control databases do not necessarily meet the full intent of the rule for All Appropriate Inquiries, but instead, the User must review reasonably ascertainable and practically reviewable (i) transaction-related title insurance documentation including, but not necessarily limited to, preliminary title reports and title commitments; and/or (ii) title search information reports from third party vendors (provided that the reports meet certain specifications.) In the event that such documents or reports could reveal the actual or likely presence of any matters of environmental concern, it is our concern that the User's failure to procure and review such documents and reports may negatively impact the ability of the User to successfully claim that All Appropriate Inquiry was satisfied.

3.0 SITE DESCRIPTION

3.1 Location and Description

The Site consists of two (2) parcels of land identified by the Richland County Tax Assessor as Parcel Number R05200-01-18 and R05200-01-13, totaling approximately 25.34 acres. The Site is located approximately 3.6 miles northeast of downtown Irmo, South Carolina. The Site is generally bound by Hollingshed Road to the south and Kennerly Road to the west.

3.2 Site Characteristics and Current Site Use

At the time of the October 15, 2024 Site reconnaissance, the Site consisted primarily of wooded land. One (1) dilapidated house was observed on the southern portion of the Site. An intermittent stream traversed the northeastern portion of the Site in a general northwest to southeast direction. Unpaved roads traversed the northeastern portion of the Site in a general northwest to southeast and north to south direction, and on the southern portion of the Site in a general north to south direction. A power line easement traverses the southwestern portion of the Site in a general east to west direction.

3.3 Site Utilities

At the time of the Site reconnaissance, the Site consisted of undeveloped land with a dilapidated vacant residence and active utility services were not identified.

3.4 Surrounding Area General Characteristics

Surrounding properties generally consist of residential development and wooded land. Residential development and wooded land is located to the north, east, and west of the Site. Residential development is located to the south of the Site.

3.5 Current Use of Adjoining Properties

The current general uses and the inferred gradient of the adjoining and/or surrounding properties are provided in the following table. Up-gradient properties, if present, are generally inferred to be topographically and hydraulically upstream of the Site. Conversely, down-gradient properties, if present, are generally inferred to be topographically and hydraulically downstream of the Site. Cross-gradient properties, if present, are generally at the same elevation as the Site.

Direction	Current Development	Inferred Gradient
North	Residential development and wooded land.	Up-Gradient
Northeast	Wooded land.	Up-Gradient
East	Wooded land and residential development.	Down-Gradient
Southeast	Residential development and wooded land.	Down-Gradient
South	Hollingshed Road followed by residential development.	Cross-Gradient
Southwest	Hollingshed Road followed by residential development.	Down-Gradient

*Phase I ESA – 1627 and 1635 Hollingshed Road
Irmo, Richland County, South Carolina*

*October 21, 2024
BLE Project No. 24-24136.01*

Direction	Current Development	Inferred Gradient
West	Residential development and wooded land.	Up-Gradient
Northwest	Wooded land.	Up-Gradient

4.0 USER PROVIDED INFORMATION

ASTM E 1527-21 defines “User” as the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site, and in this case, the User is School District Five of Lexington and Richland Counties. ASTM E 1527-21 specifies that certain tasks associated with identifying potential RECs at the Site should be performed by the User and provided to the Environmental Professional. ASTM E 1527-21 provides a User Questionnaire to assist the User and the Environmental Professional in gathering information from the User that may be material to identifying RECs.

As such, BLE provided a User/Client Questionnaire to School District Five of Lexington and Richland Counties requesting specific information regarding the Site. The completed User/Client Questionnaire is included within **Appendix B** of this report.

4.1 Land Title and Judicial Records for Environmental Liens and Activity and Use Limitations

No land title record information was provided to BLE for review as part of this assessment. The process of searching and evaluating land title records or judicial records (as applicable) ordinarily requires specialized expertise provided by title insurance companies or title search professionals. ASTM 1527-21 indicates reviewing land title records for activity use limitations and environmental liens, or judicial records where applicable, is a User Responsibility. The procurement of such documents was not included in BLE’s scope of services for this assessment.

BLE did not encounter evidence of environmental liens or activity and land use limitations during review of regulatory database records or reasonably ascertainable land title records. BLE’s review of reasonably ascertainable records related to institutional and engineering control databases is not intended to fully satisfy the rule for this component of the Phase I ESA, as review of land title and judicial records is a User responsibility.

Refer to Section 6.2.3 for reasonably ascertainable land title records reviewed by BLE.

4.2 Specialized Knowledge, Actual Knowledge, and/or Experience

The User did not report to BLE specialized knowledge, actual knowledge, and/or experience related to environmental liens or activity use limitations encumbering the Site or in connection with the Site.

4.3 Significant Valuation Reduction for Environmental Issues

No commonly known or reasonably ascertainable information regarding valuation reduction for environmental issues associated with the Site was provided to BLE for this assessment.

4.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information material to RECs associated with the Site was provided to BLE for this assessment.

4.5 Degree of Obviousness

The User did not report to BLE the presence or likely presence of a release at the Site.

4.6 Owner, Property Manager, and Occupant Information

The User did not provide BLE with information pertaining to the current Site owner, property manager, or occupant of the Site. Historical ownership information obtained by BLE is provided in Section 6.2.3.

4.7 Reason for Performing Phase I ESA

BLE understands the main objective of this Phase I ESA was to identify the presence or likely presence, use, or release on the Site of hazardous substances or petroleum products as defined in ASTM Practice E 1527-21 as a REC. BLE assumes the purpose of this Phase I ESA is to perform environmental due diligence to assist the User in qualifying for Landowner Liability Protection through the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Phase I ESA is one of the threshold criteria required to qualify for Landowner Liability Protection through CERCLA.

4.8 Other User-Provided Documents

No documents were provided by the User during this assessment.

5.0 SITE RECONNAISSANCE

The Site reconnaissance consisted of visual and/or physical observations of the Site and adjoining properties from public right-of-ways and easily accessible pathways. Site photograph documentation is included in **Appendix C**. A Site Location Map and an Aerial Photograph Map of the Site are included in **Appendix A**.

Mr. Dylan C. Kubat, G.I.T., a Staff Geologist, performed the Site reconnaissance on October 15, 2024, under the supervision of Ms. Erika L. Thompson, a Senior Scientist. Ms. Thompson is an Environmental Professional as defined in §312.10 of 40 CFR 312. At the time of the Site reconnaissance, BLE was provided access to the Site by Mr. Allen Knotts, the Director of Facilities Operation for School District Five of Lexington & Richland Counties; however, BLE performed the Site reconnaissance unescorted.

At the time of the Site visit, the weather was clear and sunny. Suitable visibility was present at the time of the Site reconnaissance. The following is a summary of visual and/or physical observations of the Site on the day of the Site visit.

5.1 Site Operations, Processes, and Equipment

Site Operations, Processes, and Equipment	
Item or Feature	Observed
Emergency generator(s)	No
Air compressors	No
Dry cleaning	No
Waste treatment system(s) and/or water treatment system(s)	No
Other processes or equipment	No

At the time of the Site reconnaissance, the Site consisted of 25.34-acres of wooded land with a dilapidated, vacant single-family residence. Operations, processes, and equipment were not observed during the Site reconnaissance.

5.2 Petroleum, Chemical, or Waste Storage

Petroleum, Chemical, or Waste Storage	
Item or Feature	Observed
UST(s) or ancillary UST equipment	No
Aboveground storage tank(s)	No
Drum(s), barrel(s), and/or container(s) > 5 gallons	Yes
Parts Washer(s)	No
Solid Waste Dumpster(s)	No
Other	No

One (1) empty 55-gallon drum was observed on the central eastern portion of the Site. BLE did not observe evidence of staining or release associated with the drum.

5.3 Drainage and Collection Systems

Draining and Collection Systems	
Item or Feature	Observed
Grease trap(s)	No
Septic tank(s) and/or leach field(s)	No
Interior Floor Drain(s)	No
Oil-water separator(s)	No
Other	No

Drainage and collection systems were not observed on the Site during the Site reconnaissance.

5.4 Electrical Transformers and PCB Containing Equipment

Electrical Transformers and PCB Containing Equipment	
Item or Feature	Observed
Pad or pole mounted transformer(s)	No
Hydraulic Lift(s)	No
Hydraulic Equipment	No
Other equipment	No

Electrical transformers and PCB containing equipment was not observed during the Site reconnaissance.

5.5 Other Notable Site Features

Item or Feature	Observed
Surface water bodies	Yes
Quarries or pits	No
Well(s)	No
Sump(s), cistern(s), catch basin(s)	No
Stormwater / runoff management	No
Pipeline marker(s)	No
Other Site features	No

A stream traverses the northeastern portion of the Site in a general northwestern to southeastern direction.

5.6 Releases or Potential Releases

Item or Feature	Observed
Stressed vegetation	No
Stained soil	No
Stained pavement or similar surface	No

Item or Feature	Observed
Leachate and/or waste seep(s)	No
Trash, debris and/or other waste material(s)	Yes
Dumping or disposal area(s)	Yes
Construction/demolition debris and/or dumped fill dirt	Yes
Surface water discoloration, odor, sheen, and/or free-floating product	No
Strong, pungent, or noxious odor(s)	No
Exterior pipe discharge(s) and/or other effluent discharge(s)	No
Other	No

BLE observed suspected dumping areas on-Site consisting of, but not limited to, construction debris, shingles, and scrap material. No obvious evidence of hazardous materials and/or petroleum products was observed in the vicinity of these dumping areas. Evidence of releases or potential releases was not observed by BLE.

6.0 RECORDS REVIEW

The objective of compiling and analyzing historical Site information and developing a history of the previous uses of the Site, adjoining properties, and surrounding area is to help identify the likelihood of past uses having led to RECs in connection with the Site. As such, BLE reviewed the following historical sources, as part of the historical research for this Phase I ESA.

6.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by Environmental Data Resources Inc. (EDR), was reviewed for information regarding reported releases of hazardous substances and/or petroleum products on or near the Site. BLE also reviewed the “unmappable” (sometimes referred to as “orphan”) listings within the database report, cross-referencing available address information, and facility names when possible. Unmappable properties are listings that could not be plotted with confidence, but are identified as being located within the general area of the Site based on the submitted Site information. The *EDR Radius Map Report* is included in **Appendix D** of this report. The following table is a summary of the findings from the EDR report:

Regulatory Database	ASTM E 1527-21 Minimum Search Distance
Lists of Federal NPL (Superfund) sites	1.0 mile
Lists of Federal Delisted NPL sites	0.5 mile
Lists of Federal sites subject to CERCLA removals and CERCLA orders	0.5 mile
Lists of Federal CERCLA sites with NFRAP	0.5 mile
Lists of Federal RCRA facilities undergoing Corrective Action	1.0 mile
Lists of Federal RCRA TSD facilities	0.5 mile
Lists of Federal RCRA generators	Site or adjoining properties
Federal institutional control/engineering control registries	Site
Federal ERNS list	Site
Lists of state- and tribal “Superfund” equivalent sites	1.0 mile
Lists of state- and tribal hazardous waste facilities	1.0 mile
Lists of state and tribal landfills and solid waste disposal facilities	0.5 mile
Lists of state and tribal leaking storage tanks	0.5 mile
Lists of state and tribal registered storage tanks	Site or adjoining properties
State and tribal institutional control/ engineering control registries	Site
Lists of state and tribal voluntary cleanup sites	0.5 mile
Lists of state and tribal brownfield sites	0.5 mile

6.1.1 Summary of State and Federal Environmental Database Records Review

Site

The Site was not listed on the applicable state and/or federal environmental databases.

Adjoining Properties

Adjoining properties were not listed on the applicable state and/or federal environmental databases.

Surrounding Properties

Surrounding properties were not listed on the applicable state and/or federal environmental databases.

6.2 Local Regulatory Agency Findings

BLE researched practically reviewable and reasonably ascertainable information from local agencies in an effort to obtain historical use information and/or information regarding RECs that may be associated with the Site. Local agencies contacted and records reviewed are discussed throughout applicable portions of this report and are further summarized below.

6.2.1 State Regulatory File Review

A Freedom of Information (FOI) request was submitted to the South Carolina Department of Environmental Services (SCDES) FOI Office in an attempt to identify available regulatory records on-file associated with the Site and the adjoining properties listed in the applicable regulatory databases (See Section 6.1). At the time of issuance of this report, the SCDES had neither confirmed nor denied the existence of department files associated with the Site. Should relevant files become available, BLE will notify the Client and issue an addendum to this report upon request.

6.2.2 Fire Department Records

BLE contacted the Columbia Fire Department office in an attempt to identify available records on-file associated with the fire department's responses to the Site. At the time of issuance of this report, the fire department had neither confirmed nor denied the existence of department files associated with the Site. Should relevant files become available, BLE will notify the Client and issue an addendum to this report upon request.

6.2.3 Recorded Land Title Records

Richland County Tax records indicate the current Site owner is car Holdings, LLC. Refer to the following table for the most recent property transactions reviewed by BLE.

Property Transactions Parcel #R05200-01-13			
Owner	Date	Deed Book	Deed Page
Edna Reese et al.	02/01/1983	D0636	0082
Edna Reese et al.	09/29/1983	D0665	0066

Isaiah L. Davis Sr.	02/11/2013	R1834	3320
Car Holdings, LLC	09/02/2022	R2776	2116

Refer to **Appendix E** for the property cards providing historical ownership information reviewed by BLE. Additional property transactions were not reviewed by BLE nor included within the scope of services for this Phase I ESA. In the event a title search is performed, BLE requests to review the provided information and issue an addendum letter to this Phase I ESA if the information alters the findings and conclusions of this report.

6.3 Standard Historical Record Sources

Historical sources were reviewed to develop a history of past uses of the Site as well as the adjoining and surrounding area. The findings obtained from these historical sources are discussed in the following sections.

6.3.1 Aerial Photographs

Aerial photographs, ranging from 1938 to 2019 and provided by EDR, were reviewed for information regarding past uses of the Site and surrounding properties. The aerial photographs are included in **Appendix F**. The following table provides information related to the reviewed aerial photographs.

Year	Site	Adjoining and Surrounding Properties
1938 1943	The Site appears as primarily wooded land with one (1) suspected single-family residence and associated outbuildings on the southern portion of the Site. The central and southwestern portion appears as suspected agricultural land.	The adjoining and surrounding properties appear to consist of wooded land and agricultural land with suspected single-family residences. Present-day Hollingshed Road appears adjoining to the south of the Site.

Year	Site	Adjoining and Surrounding Properties
1951 1964 1966 1970	The Site appears as primarily wooded land with one (1) suspected single-family residence and associated outbuildings on the southern portion of the Site. A portion of the northeastern portion of the site appears cleared as grassy land. The central and southwestern portion appears as suspected grassy land.	No substantial changes are noted.
1966	The majority of the Site is not pictured. One (1) suspected single-family residence and associated outbuildings remain on the southern portion of the Site.	No substantial changes are noted.
1970 1984 1989 1994	The Site appears as primarily wooded land with one (1) suspected single-family residence and ancillary on the southern portion of the Site. A portion of the northeastern portion of the site appears cleared as grassy land. The central and southwestern portion becomes increasingly wooded.	Residential development appears adjoining the Site to the south across Hollingshed Road and to the west circa 1984.
2006	The Site appears as wooded land with one (1) suspected single-family residence on the southern portion of the Site.	Increased residential development appears surrounding the Site. Suspected commercial development appears to the southwest and west of the Site in the surrounding area.
2011 2015 2019	The Site appears as wooded land.	No substantial changes are noted.

6.3.2 Fire Insurance Maps

A search of available Sanborn Fire Insurance Maps (Sanborn Maps) was conducted on behalf of BLE by EDR. According to EDR, Sanborn Map coverage of the Site and the immediately surrounding area was not identified. A copy of the “No Coverage” letter provided by EDR is provided in **Appendix G**.

6.3.3 City Directories

City directory records obtained by EDR, ranging from 1992 to 2020, were reviewed for information regarding past uses of the Site and surrounding properties. The City Directory records are attached in **Appendix H**. Properties along Hollingshed Road were generally listed with names indicative of residential development. BLE did not identify RECs through review of the City Directory records.

6.3.4 Historical USGS Topographic Quadrangles

Topographic maps obtained by EDR, ranging from 1946 to 2020, were reviewed for information regarding past uses of the Site and surrounding properties. The topographic maps are attached in **Appendix I**. The following table provides information related to the reviewed topographic maps.

Year	Site	Adjoining and Surrounding Properties
1904	Structures are not depicted on-Site. A tributary to Nicholas Creek is depicted traversing the Site generally orientated northwest to southeast. A road is depicted traversing the Site generally orientated northwest to southeast	Adjoining and surrounding properties appear depicted with roadways, surface water drainage features, and buildings, likely residential structures. Present-day Hollingshed Road adjoins the Site to the south.
1946 1947 1948 1949	One (1) suspected residential structure is depicted in the southern portion of the Site. A tributary to Nicholas Creek is depicted traversing the Site generally orientated northwest to southeast.	No substantial changes are noted.
1971	One (1) suspected residential structure with one (1) ancillary structure is depicted in the southern portion of the Site. An intermittent stream to Nicholas Creek is depicted traversing the Site generally orientated northwest to southeast.	Surface water ponds appear to the southwest and in the greater surrounding area.
1983 1990	One (1) suspected residential structure is depicted in the southern portion of the Site. An intermittent stream to Nicholas Creek is depicted traversing the Site generally orientated northwest to southeast.	Residential development is depicted adjoining the Site to the west and to the south across Hollingshed Road. Increased residential structures are depicted in the greater surrounding area.
2014 2017 2020	The maps depict major topographic features and roadways. Buildings are not depicted on these maps. An intermittent stream is depicted traversing the Site generally orientated northwest to southeast. Hollingshed Road is depicted adjoining the Site to the south of the Site. A surface water body is depicted to the southwest of the Site.	

6.3.5 Building Department Records

BLE performed a review of reasonably ascertainable and readily available publicly city and/or county building department records. The building department records review included reviewing building records obtained from Irmo, Richland County, and/or standard regulatory database services. According to information reviewed through Richland County, one (1) outbuilding was constructed in 1980 on the R05200-01-13 parcel.

6.3.6 Zoning/Land Use Records

According to the Richland County Zoning Map, the Site is zoned as R-3 – Residential.

6.3.7 Property Tax Files

The Site consists of two (2) parcels of land identified as Richland County Parcel Numbers R05200-01-18 and R05200-01-13. BLE reviewed readily available tax files for the Site as maintained by Richland County. Indications of *RECs* or environmental liens were not identified by BLE through the reviewed tax files. In addition, the User did not report tax liens or environmental liens associated with the Site.

6.4 Historical Review Summary

Historical records indicate the Site was developed for residential purposes from at least circa 1938 through circa 2006. The southeastern portion of the Site appeared as agricultural land from circa 1938 through circa 1951. The northeastern portion of the Site was cleared circa 1951 and becomes wooded circa 1994. The Site has been vacant wooded land since circa 2006.

The surrounding area consisted primarily of agricultural land and wooded land from at least the late 1940s through the early 1970s. Residential development appeared to the south and west of the Site in the mid-1980s. Additional residential development appeared to the north and east of the Site in the mid-2000s. Commercial development appeared in the surrounding area to the west of the Site in the mid-2000s. Development in the surrounding area has appeared similar to present-day conditions since circa 2006.

6.5 Physical Setting Sources

6.5.1 Topography

ASTM E 1527-21 requires a review of a current United States Geological Survey 7.5-minute topographic maps. Additional physical setting sources may be reviewed to assist in evaluating the potential for hazardous substances or petroleum products to migrate to the Site from an off-Site source.

According to the *Irmo*, South Carolina USGS Topographic Map, 7.5-Minute Series, dated 2020, elevation at the Site is approximately 230 to 280-feet above mean sea level. BLE utilized a USGS topographic map to generate the Site Location Map, which is included in **Appendix A**. The Site has a general topographic gradient to the east, toward an intermittent stream.

6.5.2 Geology/Hydrogeology

The following table provides geologic information obtained during the course of this Phase I ESA:

Geology / Hydrogeology	
Rock Stratigraphic Unit	Paleozoic, Ordovician, Lower Paleozoic granitic rocks (Pzgl)
Description	Plutonic and Intrusive Rocks
Inferred Hydrogeologic Gradient (Site)	East

6.5.3 Soils

According to the United States Department of Agriculture’s (USDA) Soil Conservation Service (SCS), surficial (i.e., on or near the surface) soil composition in the immediate vicinity of the Site is classified under the Nason Group. The Nason Group has a surficial soil texture of a silt loam and is classified in the hydrologic group as “Class C”: slow infiltration rates, soils with layers impeding downward movement of water, well drained soils with moderately fine to fine textures.

6.6 Data Gap Summary

The accuracy and completeness of this report may be limited by the following:

- Access Limitations – BLE was unable to access the dilapidated house due to issues with structural integrity.

- Physical Obstructions to Observations – Heavy vegetation limited physical access and visual observations on-Site.
- Historical Data Source Failure – BLE obtained and reviewed reasonably ascertainable historical sources as listed in ASTM E 1527-21 for the Site and adjoining properties. Based on our review, historical data source failures were not encountered during the course of this assessment.
- Interviews – BLE attempted to conduct interviews with past and present Site owners, operators, and occupants as well as state and local officials to obtain information associated with the Site. Not all interview requests were returned during the time frame of this report. Additional information regarding interviews is detailed in Section 7.0.
- Other – There are intervals greater than five years between selected standard historical sources because the standard historical sources to achieve that level of documentation were not reasonably ascertainable.

Considering the history of land use as documented on available historical sources as well as current Site findings, no limitations were identified that are considered significant enough to have affected our ability to identify RECs in connection with the Site.

Should additional information become available, which differs significantly from that observed during the Site reconnaissance, interviews, and research performed during the completion of this assessment, we request that this information be brought to our attention so that we may reassess the conclusions provided herein.

7.0 INTERVIEW SUMMARY

The following persons were contacted to obtain information regarding RECs in connection with the Site and/or general information regarding the Site:

Name	Title	Company	Contact Method Date	Summary of Interview
General Staff	Not Applicable	SCDES FOI Office	Form Submission 10/14/2024	See Section 6.2.1
General Staff	Not Applicable	Columbia Fire Department	Form Submission 10/14/2024	See Section 6.2.2
Mr. Allen Knotts	Director of Facilities Operations	School District Five of Lexington & Richland Counties	User Questionnaire 10/11/2024	See Section 4.0

Information obtained during interviews is incorporated throughout applicable portions of this report.

8.0 NON-SCOPE CONSIDERATIONS

BLE performed a cursory review of “non-scope” considerations (a.k.a. Business Environmental Risks (BERs)), which are risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Site, not necessarily related to those environmental issues required to be investigated through the Phase I ESA ASTM E 1527-21 Standard. These non-scope considerations have been provided solely to make the User aware of potential environmental considerations related to the Site that are out of the Scope of the Phase I ESA E 1527-21 Standard.

These non-scope considerations are not required to be assessed as part of ASTM E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. BLE’s cursory review of these non-scope considerations are not to be construed in any way as comprehensive, a survey, inspection, or otherwise, and that a qualified, certified professional may be required to adequately evaluate each specific item. Additional federal, state, and local rules may apply.

Non-Scope Considerations	Comments
Asbestos Containing Materials (ACMs)	Suspect asbestos containing materials were visually observed by BLE during the course of this assessment. No obvious evidence of substantially damaged suspect ACMs was identified during this assessment. This Phase I ESA did not include the collection of suspect ACM samples and is not considered an asbestos survey.
Suspect Lead-Based Paint (Pre-1981)	Based on the age of the Site building (circa late 1930s), the potential for lead-based paint exists. This Phase I ESA did not include the collection of lead-based paint samples and is not considered a lead-based paint survey.
Lead in Drinking Water (Pre-1991)	Based on the age of the Site building (circa late 1930s), there is potential for lead in drinking water due to the internal corrosion of plumbing systems. This Phase I ESA did not include the collection of water samples for lead analysis.
Water Intrusion and Mold	Not Applicable
Indoor Air Quality	Not Applicable
Obvious Safety Hazards	Not Applicable
Radon	The Site is located in EPA Radon Zone 3, where average indoor radon concentrations are less than 2 picocuries per liter (pCi/L). The EPA Action Level for radon is 4 pCi/L.
Cultural Resources or Endangered Species	BLE did not observe obvious cultural resources or endangered species during the course of this assessment.

Non-Scope Considerations	Comments
Wetlands	According to the US Fish and Wildlife Service (USFWS) National Wetlands Inventory (NWI) mapper, a portion of an approximate 2.49-acres freshwater forested/shrub wetland is located on the northeastern portion of the Site and a portion of an approximate 0.29-acre riverine habitat is located on the northeastern portion of the Site. A copy of the NWI map is included in Appendix E .
Erosion and Soil Control Concerns	BLE did not observe obvious evidence of erosion or soil control concerns.
Regulatory Compliance / Federal Compliance Obligations	BLE did not identify obvious regulatory compliance or federal compliance obligations in association with the Site. Please note, this Phase I ESA is not a review of regulatory compliance obligations.
Other	Not Applicable
Emerging Contaminants	Emerging contaminants are substances that are not identified as a hazardous substance by CERCLA, as interpreted by EPA regulations, and are not included in the scope of a Phase I ESA. These substances may include (1) substances that occur naturally or through biological digestions (e.g. methane) and (2) substances about which human understanding is evolving (e.g., Per- and Polyfluoroalkyl Substances (PFAS)). At the time of this report, the EPA has identified two PFAS compounds, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), as “hazardous substances” under CERCLA. Additionally, drinking water Maximum Contaminant Level (MCL) standards have been established for these two PFAS compounds. It should be noted, the SCDES has not established state regulatory standards for PFAS compounds. Based on BLE’s Site reconnaissance, historical records review, and interviews, BLE did not identify bulk sources of products which may contain emerging contaminants that are potentially a material threat to impact the Site.

9.0 FINDINGS

BLE performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-21, as outlined in BLE Proposal No. P24-1569, for the Site identified as Richland County Parcel Numbers R05200-01-18 and R05200-01-13 located at 1627 and 1635 Hollingshed Road in Irmo, Richland County, South Carolina. The following is a summary of BLE's findings and opinions of this assessment:

- The Site consists of two (2) parcels of land identified by the Richland County Tax Assessor as Parcel Number R05200-01-18 and R05200-01-13, totaling approximately 25.34 acres. The Site is located approximately 3.6 miles northeast of downtown Irmo, South Carolina. The Site is generally bound by Hollingshed Road to the south and Kennerly Road to the west.
- At the time of the October 15, 2024 Site reconnaissance, the Site consisted primarily of wooded land with one (1) dilapidated house located on the southern portion of the Site. An intermittent stream traversed the northeastern portion of the Site in a general northwest to southeast direction. Unpaved roads traverse the northeastern portion of the Site in a general northwest to southeast and north to south direction, and on the southern portion of the Site in a general north to south direction. A power line easement traverses the southwestern portion of the Site in a general east to west direction.
- No underground storage tanks (USTs) or aboveground storage tanks (ASTs) were observed or otherwise identified associated with the Site.
- One (1) empty 55-gallon drum was observed on the central eastern portion of the Site. BLE did not observe staining or evidence of a release associated with the drum.
- Historical records indicate the Site was developed for residential purposes from at least circa 1938 through circa 2006. The southeastern portion of the Site appeared as agricultural land from circa 1938 through circa 1951. The northeastern portion of the Site is cleared circa 1951 and becomes wooded circa 1994. The Site has been vacant wooded land since circa 2006.
- Surrounding properties generally consist of residential development and wooded land. Residential development and wooded land are located to the north, east, and west of the Site. Residential development is located to the south of the Site beyond Hollingshed Road.
- The surrounding area consisted primarily of agricultural land and wooded land from at least the late 1940s through the early 1970s. Residential development appeared to the south and west of the Site in the mid-1980s. Additional residential development appeared to the north and east of the Site in the mid-2000s. Commercial development appeared to the west of the Site in the mid-2000s. Development in the surrounding area has appeared similar to present-day conditions since circa 2006.
- Neither the Site nor immediately adjacent properties were identified in environmental regulatory databases. Surrounding properties (Section 6.1 and **Appendix D**) were identified through review of the environmental databases. However, it is BLE's opinion these properties do not represent a REC, due to their topographic gradient, hydrogeologic separation from the Site, and/or the information provided in available regulatory database records.

10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-21 of Richland County Parcel Numbers R05200-01-18 and R05200-01-13 located at 1627 and 1635 Hollingshed Road in Irmo, Richland County, South Carolina, the Site. Any exceptions to, or deletions from, this practice are described in Section 2.2 and/or Section 6.6 of this Phase I ESA. This assessment has revealed the following:

10.1 Recognized Environmental Conditions (RECs)

No RECs were identified during this assessment.

10.2 Controlled Recognized Environmental Conditions (CRECs)

No CRECs were identified during this assessment.

10.3 Historical Recognized Environmental Conditions (HRECs)

No HRECs were identified during this assessment.

10.4 De Minimis Conditions

No de minimis conditions were identified during this assessment.

10.5 Business Environmental Risks (BERs)

The following BERs were identified during this assessment:

- Suspect ACMs were visually observed by BLE during the course of this assessment. This Phase I ESA did not include the collection of suspect ACM samples and is not considered an asbestos survey.
- According to the USFWS NWI mapper, a portion of an approximate 2.49-acre freshwater forested/shrub wetland and a portion of an approximate 0.29-acre riverine habitat are located on the northeastern portion of the Site.

10.6 Significant Data Gaps

No significant data gaps were encountered during this assessment.

11.0 CERTIFICATION OF ENVIRONMENTAL PROFESSIONALS

BLE has performed this ESA of Richland County Parcel Numbers R05200-01-18 and R05200-01-13 located at 1627 and 1635 Hollingshed Road in Irmo, Richland County, South Carolina, the Site. The scope of the ESA was generally consistent with ASTM E 1527-21. Resumes for the following environmental professionals are included in **Appendix J**.

This assessment was prepared under the supervision of Ms. Erika L. Thompson, Senior Scientist and an Environmental Professional as defined by 40 CFR 312.10. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. § 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312. The User may have additional responsibilities to fully qualify for the Landowner Liability Protections through CERCLA and such items are not the responsibilities of the Environmental Professionals.

Sincerely,

BUNNELL-LAMMONS ENGINEERING INC.

Site Assessor and Report Author:

Dylan C. Kubat, G.I.T.
Staff Geologist

Environmental Professional:

Erika L. Thompson
Senior Scientist

To be returned to BLE with the authorized proposal

To be eligible for one of the requirements to qualify for one of the *Landowner Liability Protections* offered under CERCLA, please provide the following information (if available) to BLE for inclusion in our assessment report. According to the referenced ASTM standard, missing or incomplete information could result in a determination that "all appropriate inquiry" is not complete. If you have any questions, please contact your BLE representative.

GENERAL INFORMATION

User/client name(s):	Allen Knotts
Property name and address:	1627 / 1637 Hollingshead Rd. Irmo, SC 29063. GIS # R05200-01-13 R05200-01-18
Property type/use:	School
Type of property transaction:	(Purchase, sale, exchange, etc.) Purchase
Reason ESA is being performed:	(Lender requirement, insurance requirement, risk management, etc.) State Requirement
Property contact(s) information:	Allen Knotts 803-354-6641
Other contact(s) with knowledge of property history:	N/A

REQUIRED INFORMATION (if "yes" to any question, please provide information to BLE)

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

2. Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

5. Commonly known or reasonably ascertainable information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

- (a.) Do you know the past uses of the *property*?
- (b.) Do you know of specific chemicals that are present or once were present at the *property*?
- (c.) Do you know of spills or other chemical releases that have taken place at the *property*?
- (d.) Do you know of any environmental cleanups that have taken place at the *property*?

6. The degree of obviousness of the presence or likely presence of contamination at the *property* and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the *user* of this *ESA*, based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

SIGNATURE

It is understood that the information presented in this form is an integral part of the requested ASTM E 1527-21 Phase I ESA process and that BLE will evaluate and rely on this information in the development of the final Phase I ESA report.

Prepared By:**Print/Type Name:**Allen Knotts**Title:****Company:****Date:**

According to the referenced standard, the user/client is under obligation to provide the environmental professional (BLE) with current and/or historical documents regarding environmental conditions at the subject property. Listed below are some examples of the types of documents that may help us complete the ESA:

- Maps showing property boundary, County Assessor parcel number, and major subject property features, Aerial photographs and fire insurance maps;
- Environmental liens, Recorded Activity and Use Limitations (AULs), prior Phase I ESA/Transaction Screen reports, Phase II ESA reports, reports of soil/groundwater sampling data, report of any subsurface investigations, Phase III Cleanup or Remediation documentation, Risk Assessment reports, Geotechnical Investigation reports, Environmental Compliance Audit reports, asbestos/lead paint/radon/mold/indoor air quality reports, wetland/natural resources assessments;
- Underground/Aboveground Storage Tank (UST/AST) registrations, installation dates, construction type, capacity, location information, documentation for other underground equipment such as associated UST piping, sumps, cisterns, clarifiers, oil/water separators, catch basins, wells (including dry wells), and underground injection systems, regulatory agency inspection records and violation history, notices or other correspondence from local, state, and federal regulatory agencies relating to past or current violations of environmental laws, spill/release notification reports, SARA 313 (Form R) reports, hazardous waste generator notices, hazardous waste manifests, environmental permits and registrations (such as solid waste and/or hazardous waste disposal, wastewater discharge permits with local sewer districts and/or NPDES, hazardous waste treatment, including Permit-By-Rule, Conditional Authorization, and/or Conditional Exemption), air emission permits (for boilers, paint booths, etc.), including boilers, paint booths, etc.;
- Safety plans, preparedness and prevention plans, spill prevention, countermeasure and control plans, etc. Community right-to-know plans.

BLE appreciates your cooperation and values the opportunity to provide you with these services.

Thank you.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

1627 HOLLINGSBED RD
IRMO, SC 29063

COORDINATES

Latitude (North):	34.1185390 - 34° 7' 6.74"

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS..... Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG..... RCRA - Large Quantity Generators
RCRA-SQG..... RCRA - Small Quantity Generators
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System

EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROLS..... Institutional Controls Sites List

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state- and tribal hazardous waste facilities

SHWS..... Site Assessment Section Project List

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF..... Permitted Landfills List

Lists of state and tribal leaking storage tanks

LUST..... Leaking Underground Storage Tank List
INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST..... Underground Storage Tank Listing
UST..... Comprehensive Underground Storage Tanks
AST..... Aboveground Storage Tank List
INDIAN UST..... Underground Storage Tanks on Indian Land
GWT..... GWT Management Tracking

State and tribal institutional control / engineering control registries

RCR..... Registry of Conditional Remedies
AUL..... Land Use Controls

Lists of state and tribal voluntary cleanup sites

VCP..... Voluntary Cleanup Sites
INDIAN VCP..... Voluntary Cleanup Priority Listing

Lists of state and tribal brownfield sites

BROWNFIELDS..... Brownfields Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS..... A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY..... Solid Waste Recycling Facilities
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands
ODI..... Open Dump Inventory
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations

EXECUTIVE SUMMARY

IHS OPEN DUMPS..... Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL..... Delisted National Clandestine Laboratory Register
ALLSITES..... Site Assessment & Remediation Public Record Database
CDL..... Clandestine Drug Lab Sites
US CDL..... National Clandestine Laboratory Register

Local Land Records

LIENS 2..... CERCLA Lien Information

Records of Emergency Release Reports

HMIRS..... Hazardous Materials Information Reporting System
SPILLS..... Spills Database List
SPILLS 90..... SPILLS 90 data from FirstSearch
SPILLS 80..... SPILLS 80 data from FirstSearch

Other Ascertainable Records

FUDS..... Formerly Used Defense Sites
DOD..... Department of Defense Sites
SCRD DRYCLEANERS..... State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR..... Financial Assurance Information
EPA WATCH LIST..... EPA WATCH LIST
2020 COR ACTION..... 2020 Corrective Action Program List
TSCA..... Toxic Substances Control Act
TRIS..... Toxic Chemical Release Inventory System
SSTS..... Section 7 Tracking Systems
ROD..... Records Of Decision
RMP..... Risk Management Plans
RAATS..... RCRA Administrative Action Tracking System
PRP..... Potentially Responsible Parties
PADS..... PCB Activity Database System
ICIS..... Integrated Compliance Information System
FTTS..... FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS..... Material Licensing Tracking System
COAL ASH DOE..... Steam-Electric Plant Operation Data
COAL ASH EPA..... Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER..... PCB Transformer Registration Database
RADINFO..... Radiation Information Database
HIST FTTS..... FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS..... Incident and Accident Data
CONSENT..... Superfund (CERCLA) Consent Decrees
INDIAN RESERV..... Indian Reservations
FUSRAP..... Formerly Utilized Sites Remedial Action Program
UMTRA..... Uranium Mill Tailings Sites
LEAD SMELTERS..... Lead Smelter Sites
US AIRS..... Aerometric Information Retrieval System Facility Subsystem
US MINES..... Mines Master Index File
MINES MRDS..... Mineral Resources Data System
ABANDONED MINES..... Abandoned Mines

EXECUTIVE SUMMARY

FINDS.....	Facility Index System/Facility Registry System
DOCKET HWC.....	Hazardous Waste Compliance Docket Listing
ECHO.....	Enforcement & Compliance History Information
UXO.....	Unexploded Ordnance Sites
FUELS PROGRAM.....	EPA Fuels Program Registered Listing
PFAS NPL.....	Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES.....	Federal Sites PFAS Information
PFAS TRIS.....	List of PFAS Added to the TRI
PFAS TSCA.....	PFAS Manufacture and Imports Information
PFAS RCRA MANIFEST.....	PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR.....	PFAS Contamination Site Location Listing
PFAS WQP.....	Ambient Environmental Sampling for PFAS
PFAS NPDES.....	Clean Water Act Discharge Monitoring Information
PFAS PROJECT.....	NORTHEASTERN UNIVERSITY PFAS PROJECT
PFAS ECHO.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS ECHO FIRE TRAIN.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS PT 139 AIRPORT.....	All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC.....	Aqueous Foam Related Incidents Listing
BIOSOLIDS.....	ICIS-NPDES Biosolids Facility Data
UST FINDER RELEASE.....	UST Finder Releases Database
UST FINDER.....	UST Finder Database
E MANIFEST.....	Hazardous Waste Electronic Manifest System
AIRS.....	Permitted Airs Facility Listing
ASBESTOS.....	ASBESTOS
COAL ASH.....	Coal Ash Disposal Sites
DRYCLEANERS.....	Drycleaner Database
Financial Assurance.....	Financial Assurance Information Listing
GWCL.....	Groundwater Contamination Inventory
MANIFEST.....	Hazardous Waste Manifest Data
NPDES.....	Waste Water Treatment Facilities Listing
UIC.....	Underground Injection Wells Listing

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

AUL: Land Use Controls

The term Land Use Controls or "LUCs" encompass institutional controls, such as those involved in real estate interests, governmental permitting, zoning, public advisories, deed notices, and other legal restrictions. The term also includes restrictions on access, whether achieved by means of engineered barriers (e.g., fence or concrete pad) or by human means (e.g., the presence of security guards). Additionally, the term includes both affirmative measures to achieve the desired restrictions (e.g., night lighting of an area) and prohibitive directives (e.g., restrictions on certain types of wells for the duration of the corrective action). Considered altogether, the LUCs for a facility will provide a tool for how the property should be used in order to maintain the level of protectiveness that one or more corrective actions were designed to achieve.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

ALLSITES: Site Assessment & Remediation Public Record Database

The South Carolina Department of Health and Environmental Control is pleased to have the Public Record for your review. The purpose of this database is two-fold. First, it will provide to communities another form of notice of cleanup activity, allowing them to have more information about assessment and cleanup activities in their area and in the State. Second, it can assist those seeking to redevelop brownfield properties within South Carolina.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FIN ASSURANCE 1: Financial Assurance Information Listing

Financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 06/17/2024	Source: Department of Environmental Services
Date Data Arrived at EDR: 06/20/2024	Telephone: 803-896-4067
Date Made Active in Reports: 09/12/2024	Last EDR Contact: 08/28/2024
Number of Days to Update: 84	Next Scheduled EDR Contact: 12/16/2024
	Data Release Frequency: Semi-Annually

FIN ASSURANCE 2: Financial Assurance Information Listing

Hazardous waste financial assurance information.

Date of Government Version: 04/10/2024	Source: Department of Environmental Services
Date Data Arrived at EDR: 04/11/2024	Telephone: 803-898-3880
Date Made Active in Reports: 07/10/2024	Last EDR Contact: 08/14/2024
Number of Days to Update: 90	Next Scheduled EDR Contact: 12/16/2024
	Data Release Frequency: Varies

FIN ASSURANCE 3: Financial Assurance Information Listing

UST financial assurance information.

Date of Government Version: 06/28/2024	Source: Department of Environmental Services
Date Data Arrived at EDR: 06/28/2024	Telephone: 803-898-3880

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/05/2024

Date Data Arrived at EDR: 05/07/2024

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

North Map:	15786906 RICHTEX, SC
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
45079C0210K	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
45039C0475C	FEMA FIRM Flood data
45079C0095K	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
IRMO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
4	1/4 - 1/2 Mile SE	E
1G	1/4 - 1/2 Mile SE	E

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Nason

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 104 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 5.5 Min: 4.5
2	40 inches	59 inches		Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 5.5 Min: 4.5
3	5 inches	11 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 5.5 Min: 4.5
4	11 inches	40 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 14 Min: 4	Max: 5.5 Min: 4.5

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 803-734-9494

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

South Carolina Water Well Database

Source: Department of Natural Resources

Telephone: 803-734-6440

Water wells in the Coastal Plain counties of South Carolina.

Water Well Database

Source: Department of Natural Resources

Telephone: 864-654-1671

A listing of water wells in the Piedmont (upstate) counties.

OTHER STATE DATABASE INFORMATION

RADON

State Database: SC Radon

Source: Department of Health & Environmental Control

Telephone: 864-241-1090

Radon Test Results by Zip Code

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Bunnell-Lammons Engineering were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 3969-44E5-8B32

PO # 24-24136

Project 1627 & 1635 Hollingshed Road

UNMAPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 3969-44E5-8B32

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Bunnell-Lammons Engineering were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

DYLAN KUBAT, GIT

Staff Geologist

Years of Experience

1

Education

B.S. Geological and
Earth Sciences/
Geosciences,
University of South
Carolina (2022)

Certifications

Geologist in Training -
SC (GIT)

Career Summary

Mr. Kubat is a Staff Geologist based out of our Columbia office and works in the Due Diligence & Compliance department. Mr. Kubat's primary responsibilities include Phase I ESAs, Phase II ESAs, Hazardous Materials Surveys, and soil and groundwater sampling.

Project Experience

- **Phase I Environmental Site Assessments - Various Locations in Southeast**

Mr. Kubat supports the preparation of Phase I Environmental Site Assessments of residential, commercial, and industrial properties pursuant to ASTM E-1527 and AAI. Mr. Kubat also performs research on property records, regulatory database searches, and performs Site reconnaissance under the oversight of an Environmental Professional.

- **Phase II Environmental Site Assessments - Various Locations in Southeast**

Mr. Kubat supports field activities associated with Phase II Environmental Site Assessments, including the collection of groundwater, soil, and sub-slab soil gas samples. He prepares Chain of Custody records associated with sample transport and prepares reports documenting laboratory results and field activities.

- **Soil, Groundwater, and Gas Sampling**

Mr. Kubat performs groundwater sampling for underground storage tank facilities, drycleaners, and various other regulated facilities across the Southeast. He is responsible for the sampling of groundwater monitoring wells and surface water streams in accordance with state regulatory requirements, field analysis, preparation of Chain of Custody records, and sample submittal. In addition, Mr. Kubat performs analytical data entry and supports Project Managers with report preparation.

- **Construction Materials Testing**

Mr. Kubat performs various testing methods primarily in relation to soil compaction, concrete, and soil bearing capacity. He also frequently performs rebar inspections.

Years of Experience

20+

Education

B.A. Environmental
Geology, Hanover
College (1998)

Certifications

40-Hr HAZWOPER

SCDHEC UST A/B
Operator

Career Summary

Ms. Thompson is a proven project manager and geologist with over 20 years of experience in the environmental consulting field. She has effectively managed a broad range of projects, specializing in due diligence and the investigation of contaminated soil and groundwater.

Ms. Thompson is consistently recognized for outstanding technical writing skills and working knowledge of State and Federal agency guidelines. Ms. Thompson's experience includes:

- Managing multi-site portfolios of Phase I ESAs and desktop reviews conducted on gasoline/diesel fueling stations and railcar facilities.
- Performing numerous Phase I Environmental Site Assessments (ESA) of commercial and industrial properties across the country. Conducting Federal, State, and local regulatory document reviews, historical research, and field reconnaissance in accordance to ASTM E 1527-13.
- Implementing Phase II ESAs to further investigate the recognized environmental conditions identified within Phase I ESA findings.
- Conducting and managing multiple Underground Storage Tank (UST) related projects, including soil and groundwater assessments and remediation.
- Conducting total fluid recovery events and groundwater sampling for petroleum release sites. Scopes include measuring removed fluid volume and vapor mass, collecting PID readings to calculate hydrocarbons removed, and collecting and analyzing groundwater samples.
- Performing extensive soil and groundwater investigations. Conducting field work including the collection of soil and groundwater samples, oversight of drilling activities, installation of monitoring wells, and obtaining field measurements. Analyzing field data and completed reports for submittal to state regulatory agencies.
- Supervising large scale excavations of hydrocarbon-impacted soil and obtaining confirmation samples for site closure.
