

# Student Devices USE & CARE

Our district is dedicated to providing students with the necessary resources to support their learning needs. We are proud to maintain a 1:1 ratio, with each student assigned a personal device. However, during this school year, we have seen a significant rise in the number of lost or damaged devices.

Here are some helpful tips to maintain your device and keep it safe!

## CARE & HANDLING TIPS

- 1. Avoid placing food or drinks near the device.**
- 2. Carry It Carefully:** When moving around, use both hands to carry your device, and keep it close to your body to prevent dropping it.
- 3. Clean the Screen Safely:** Use a soft, dry cloth to clean the screen. Never use harsh cleaners or spray directly on the screen.
- 4. Store It Properly:** When not using your device, store it on a flat surface away from edges or where it could be accidentally bumped.
- 5. Ask for Help if Something's Wrong:** If the device isn't working properly, let your teacher know or contact FLATS right away instead of trying to fix it yourself.
